Recent studies have examined the genetics behind white markings and have located certain genetic loci that influence their expression.

Horse markings Markings may appear to change slightly when a horse grows or sheds its winter coat, however this difference is simply a factor of hair coat length; the underlying pattern does not change. Most horses have some markings, and they help to identify the horse as a unique individual. Markings are present at birth and do not change over the course of the horse's life. Bend-Or spots: Dark faint spotting, usually seen on horses with a chestnut or palomino Markings on horses are usually distinctive white areas on an otherwise dark base coat color. Horses with the W20 allele typically have white face and leg markings. Most markings have pink skin underneath most of the white hairs, though a few faint markings may occasionally have white hair with no underlying pink skin
