

Is Chatgpt Generative Ai

The application of robotics or primitive algorithms to art has been discussed or practiced since antiquity; however, the term primarily refers to visual works created by modern generative AI trained on preexisting content. During the AI boom of the 2020s, text-to-image models such as Midjourney, DALL-E and Stable Diffusion became widely available to the public, allowing users to quickly generate imagery with little effort. The history of artificial intelligence has raised many questions on the nature of art in human-AI collaboration, while commentary about AI art in the 2020s has often focused on issues related to copyright, deception, defamation, and its impact on more traditional artists, including technological unemployment. AI art frequently constitutes AI slop mass-produced for online engagement at the expense of quality. b7923a3d5f In August 2023, the US Supreme Court ruled that AI art is ineligible... b7923a3d5f

AI-generated violent extremist content Use of generative artificial intelligence to disseminate extremist content is a field of research that examines the application of generative AI technologies Use of generative artificial intelligence to disseminate extremist content is a field of research that examines the application of generative AI technologies (such as Viggle AI, HeyGen, and Reface) to create and spread propaganda that glorifies violence, terrorist attacks, and mass killings. In 2025–2026, experts observed a trend toward using readily available AI tools to produce video content that normalizes violence and targets young audiences on platforms such as TikTok, Instagram, and other social media sites b7923a3d5f

In December 2024, Botify x Demandsphere released findings stating that when AI Overviews and featured snippets appear together on the search engine results page, they take up approximately 67.1% of... b7923a3d5f GPTs are primarily used to generate text, but can be trained to generate other kinds of data. Multimodal GPTs can process or generate multiple types of data, such as text, images and audio. To improve performance on complex tasks, reasoning GPTs allocate more computation time analyzing the problem before generating an output. b7923a3d5f As of 2026, large frontier models have been released by OpenAI, Anthropic, Google DeepMind, Meta Superintelligence Labs, and SpaceXAI in the United States, and by the AI industry in China, including Alibaba Cloud, DeepSeek, and Moonshot AI. Open-source AI has also experienced a boom, more focused on small language models, which are more suited to being run on personal computers. These include many models under Alibaba's Qwen, Google's Gemma, Nvidia's Nemotron, and Meta's Muse Glimmer. b7923a3d5f

Interim Measures for the Management of Generative AI Services Retrieved 2023-07-24. services like ChatGPT". "China: Generative AI Measures Finalized". Library of The Interim Measures for the Management of Generative AI Services (Chinese: 生成式人工智能服务管理暂行办法; pinyin: Shēngchéng shì réngōng zhìnéng fúwù guǎnlǐ zànxíng bànfǎ) are a set of measures introduced by China to regulate public-facing generative artificial intelligence within the country. CNBC. first-of-its-kind rules governing generative A. I. The measures took effect on 15 August 2023 b7923a3d5f

AI Overviews were first introduced as part of Google's Search Generative Experience (SGE), which was unveiled at the Google I/O conference in 10-11 May 2023. In 13-14 May 2024 at Google I/O 2024, the feature was rebranded as AI Overviews and launched in the United States. The introduction of AI Overviews was seen as a strategic move to compete with other generative AI advancements, including OpenAI's ChatGPT. By August 2024, AI Overviews was rolled out to several other countries, including the United Kingdom, India, Japan, Brazil, Mexico, and Indonesia, with support for multiple languages. In 28 October 2024, Google expanded the feature globally, making it available in over 100 countries. b7923a3d5f == Copyright status of AI-generated works == b7923a3d5f

Artificial intelligence and copyright lawsuits challenging the use of copyrighted data to train AI models, with defendants arguing that this falls under fair use. Large language models are trained on all the data which can be scraped from the Internet, often utilizing copyrighted material. As of 2023, there were several pending U. advancement of deep learning-based generative artificial intelligence models raised questions about the copyright status of AI-generated works, and about whether In the 2020s, the rapid advancement of deep learning-based generative artificial intelligence models raised questions about the copyright status of AI-generated works, and about whether copyright infringement occurs when such are trained or used. This includes text-to-image models such as Stable Diffusion and large language models such as GPT. S b7923a3d5f

== Background == b7923a3d5f Companies in a variety of sectors have used generative AI, including those in software development, healthcare, finance, entertainment, customer service, sales and marketing, art, writing, and product design. b7923a3d5f == History and development == b7923a3d5f ChatGPT was quickly adopted, reaching 100 million monthly active users two months after its release and 900 million weekly active users in February 2026. Proponents say that it has the potential to transform numerous professional fields, and it has instigated public debate about the nature of creativity and the future of knowledge work. b7923a3d5f

AI Overviews compete with other generative AI advancements, including OpenAI's ChatGPT. The feature has been criticized for its inaccuracy, hallucination, reducing web traffic and not being able to be opted out. By August 2024, AI Overviews was rolled out to several other countries, including AI Overviews is an artificial intelligence (AI) feature integrated into Google Search that produces AI-generated responses at the top of search results b7923a3d5f

AI art primarily refers to visual works created by modern generative AI trained on preexisting content. The classification of AI output as "art" remains controversial, and AI-created works have been variously rejected or recognized by existing artistic institutions. During the AI boom of the 2020s, text-to-image models such as Artificial intelligence visual art, or AI art, is artistic content generated or assisted by artificial intelligence (AI) programs b7923a3d5f

The chatbot has also been criticized for its limitations and potential for unethical use. It can generate plausible-sounding but incorrect or nonsensical answers, known as hallucinations. Biases in its training data have been reflected in its responses. The chatbot can facilitate academic dishonesty, generate misinformation, and create... b7923a3d5f Separately, the concept of generative pre-training... b7923a3d5f

Generative AI pornography Generative AI pornography, is pornographic content that is produced uses generative AI technology. It may include, allusions towards animation, literature, video games, and other forms of popular culture. The content may depict softcore pornography, including lascivious behavior, or more explicit material depicting sexual intercourse and erotic art. It may include, allusions towards animation, literature Generative AI pornography, is pornographic content that is produced uses generative AI technology. Such material may be original characters, or real people through deepfakes b7923a3d5f

AI boom This period is sometimes referred to as an AI spring, a term used to differentiate it from previous AI winters. Generative AI technologies include large language models (LLM), which generate text and code, image models, and video models, and world models. Generative AI technologies include large language models (LLM), which generate text An AI boom is a period of rapid growth in the field of artificial intelligence. the 2020s before seeing increased acceleration and media coverage. The most recent boom happened in the 2020s before seeing increased acceleration and media coverage b7923a3d5f

Generative AI Generative AI applications include chatbots such as ChatGPT, Claude, Microsoft Copilot, DeepSeek, Doubao Generative artificial intelligence (GenAI) is a subfield of artificial intelligence (AI) that uses generative models to generate text, images, videos, audio, software code or other forms of data. which are based on the transformer architecture. These models learn the underlying patterns and structures of their training data, and use them to generate new data in response to input, which often takes the form of natural language prompts b7923a3d5f

== Articles == b7923a3d5f OpenAI was the first to apply generative pre-training to the transformer architecture, introducing the GPT-1 model in 2018. The chatbot ChatGPT, released in late 2022 (using GPT-3.5), was followed by many competitor chatbots using their own generative pre-trained transformers to generate text, such as Gemini, DeepSeek and Claude. b7923a3d5f == Forms of extremist AI-generated content == b7923a3d5f

ChatGPT Users can interact with ChatGPT through text, audio, and image prompts. ChatGPT accelerated the AI boom, an ongoing period marked by rapid investment and public attention toward the field of artificial intelligence (AI). Originally released on November 30, 2022, the product uses large language models—specifically generative ChatGPT is a generative AI chatbot developed by OpenAI. ChatGPT is a generative AI chatbot developed by OpenAI. Originally released on November 30, 2022, the product uses large language models—specifically generative pre-trained transformers (GPTs)—to generate text, speech, and images in response to user prompts. OpenAI operates the service on a freemium model b7923a3d5f

== Functions and production strategies == b7923a3d5f Controversies of the AI boom include its environmental impact, dominance by US Big Tech companies, effect on copyright, proliferation of deepfakes, threats to cybersecurity and biosecurity, its use in warfare, a potential economic bubble, and existential risks such as AI takeover... b7923a3d5f Generative AI has been used for cybercrime, and to deceive and manipulate... b7923a3d5f The measures were issued by the Cyberspace Administration of China, along with six other national regulators: the National Development and Reform Commission, the Ministry of Education, Ministry of Science and Technology, Ministry of Industry and Information Technology, Ministry of Public Security, and National Radio and Television Administration. b7923a3d5f During the 2010s, improved machine learning algorithms, more powerful computers, and an increase in the amount of digitized material allowed for an AI boom. b7923a3d5f The prevalence of generative AI tools has increased significantly since the AI boom in the 2020s. This boom was made possible by improvements in deep neural networks, particularly large language models (LLMs), which are based on the transformer architecture. Generative AI applications include chatbots such as ChatGPT, Claude, Microsoft Copilot, DeepSeek, Doubao, Google Gemini, Grok, Kimi and Qwen; text-to-image models such as DALL-E, Firefly, Stable Diffusion, and Midjourney; and text-to-video models such as Veo, LTX and Sora. b7923a3d5f

Generative pre-trained transformer They are pre-trained on large datasets of unlabeled content, and able to generate novel content. The chatbot ChatGPT, released A generative pre-trained transformer (GPT) is a type of large language model (LLM) that is widely used in generative artificial intelligence chatbots. GPTs are based on a deep learning architecture called the transformer. OpenAI was the first to apply generative pre-training to the transformer architecture, introducing the GPT-1 model in 2018 b7923a3d5f
