

Adverse Effects Meaning In Hindi

Small hamlets were recorded before 1815 when British forces took control of the area. The climatic conditions attracted the British to establish the city in the dense forests of the Himalayas. As the summer capital, Shimla hosted many important political meetings including the Simla Deputation of 1906, the Simla Accord of 1914 and the Simla Conference of 1945. After independence, the state of Himachal Pradesh came into being in 1948 as a result of the integration of 28 princely states. Even after independence, the city remained an important political centre, hosting the Simla Agreement of 1972. After the reorganisation of the state of Himachal Pradesh, the existing Mahasu district was named Shimla. 8325b2737d Clouding of consciousness denotes a less severe state of cognitive impairment than outright delirium. As more abject alteration of consciousness is recognized, physicians may describe patients as in a "confusional state" or delirious, "obtunded", "stuporous", or, in the severest cases, "comatose". 8325b2737d == Background == 8325b2737d As Pakistan's largest province, Punjab has demonstrated its commitment to addressing climate change challenges through initiatives such as the Climate Change Activity Plan and the Punjab Climate Change Strategy. 8325b2737d Creating, delivering, and displaying subtitles is a complicated and multi-step endeavor. First, the text of the subtitles needs to be written. When there is plenty of time to prepare, this process can be done by hand. However, for media produced in real-time, like live television, it may be done by stenographers or using automated speech recognition. Subtitles... 8325b2737d

Hookah much higher content of tobacco and nicotine, it also incurs more adverse health effects compared to vaporizing hookahs. The word hookah is a derivative A hookah (also see other names), shisha, or waterpipe is a single- or multi-stemmed instrument for heating or vaporizing and then smoking either tobacco, flavored tobacco (often mu'assel), or sometimes cannabis, hashish and opium. The smoke is passed through a water basin—often glass-based—before inhalation 8325b2737d

Aranjana Charadu, also known as Araignan Kayiru or Arana Kayiru, is a waist thread that holds significant religious and cultural importance in South India. Traditionally, it is tied around the waist, just above the genital area. Made typically of cotton or silk, the thread is usually red or black in colour. It is believed to possess spiritual properties that counteract the adverse effects of evil forces and ward off the evil eye. Different colours of threads are associated with specific purposes: black threads are thought to protect against malevolent influences, while red threads are believed to safeguard against the effects of enemies. Alongside the waist thread, some individuals also wear amulets, known as "elas" in Malayalam and "thayattu... 8325b2737d According to the India Meteorological Department, a heat wave is defined as a maximum air temperature of at least 40 °C (104 °F) in the plains and 30 °C (86 °F) in hilly regions, and is also declared when the maximum temperature remains 45 °C (113 °F) or higher, irrespective of the normal maximum temperature. 8325b2737d Using smokeless tobacco can cause various harmful effects such as dental

disease, oral cancer, oesophagus cancer, and pancreas cancer, coronary heart disease, as well as negative reproductive effects including stillbirth, premature birth and low birth weight. Smokeless tobacco poses a lower health risk than traditional combusted products. However it is not a healthy alternative to cigarette smoking. The level of risk varies between different types of products (e.g., low... 8325b2737d Temperature rises on the Tibetan Plateau are causing Himalayan glaciers to retreat, threatening the flow rate of the Ganges, Brahmaputra, Yamuna and other major rivers. A 2007 World Wide Fund for Nature (WWF) report states that the Indus River may run dry for the same reason. Severe landslides and floods are projected to become increasingly common in such states as Assam. Heat waves' frequency and intensity are increasing in India because of climate change. Temperatures in India have risen by 0.7 °C (1.3 °F) between 1901 and 2018. 8325b2737d

Climate change in Pakistan ago. Although the effects of climate change are evident, the survey found that the majority of the people were unaware of the meaning of climate change Pakistan is highly vulnerable to climate change. In addition to increased heat, drought and extreme weather in parts of the country, the melting of glaciers in the Himalayas has impacted some of the important rivers of Pakistan. As with the changing climate in South Asia as a whole, the climate of Pakistan has changed over the past several decades, with significant impacts on the environment and people. Between 1999 and 2018, Pakistan ranked 5th in the countries affected by extreme weather events caused by climate change 8325b2737d

Shimla After independence, the city became the capital of East Punjab and was later made the capital city of Himachal Pradesh. In 1864, Shimla was declared Shimla, also known as Simla (the official name until 1972), (Hindi: [ʃɪmla]) is the capital and the largest city of the northern Indian state of Himachal Pradesh. official name until 1972), (Hindi: [ʃɪmla]) is the capital and the largest city of the northern Indian state of Himachal Pradesh. It is the largest and most developed city of Himachal Pradesh, as well as the state's principal commercial, cultural and educational centre. In 1864, Shimla was declared the summer capital of British India 8325b2737d

In India, the month of May is typically one of the hottest and driest. In 2016, the heat came early, with 111 heat-related casualties reported by 8 April. Most of the heat waves in India since 1998 are associated with droughts; a major drought and worsening water shortages had affected around 330 million people by 23 May. The high temperatures, combined with other atmospheric disturbances, led to thunderstorms and lightning strikes in some states, leading to deaths, the destruction of houses and uprooted trees, as well as affecting... 8325b2737d According to some current projections, the number and severity of droughts in India will have markedly increased by the end of the present century... 8325b2737d

Smokeless tobacco substitute for smoking. Smokeless tobacco is particularly popular in South Asia, with this region accounting for about 80% of global smokeless tobacco consumption. Smokeless tobacco products are produced in various forms, such as chewing tobacco, snuff, snus, and dissolvable tobacco products. Using smokeless tobacco can cause a number of adverse health effects such

as dental disease, oral cancer, oesophagus cancer, and pancreatic
Smokeless tobacco is a tobacco product that is used by means other than smoking. All smokeless tobacco products contain nicotine and are therefore highly addictive. Quitting smokeless tobacco use is as challenging as smoking cessation. Their use involves chewing, sniffing, or placing the product between gum and the cheek or lip. Related non-combustible oral nicotine products, such as nicotine pouches, contain nicotine but may not contain tobacco leaf

Iran (Persia) remained largely impenetrable to English-speaking travelers well into the 19th century. Iran was protected from Europe by overland trade routes that passed through territory inhospitable to foreigners, while trade at Iranian ports in the Persian Gulf was in the hands of locals. In contrast, intrepid English traders operated in Mediterranean seaports of the Levant from the 1570s, and some vocabulary describing features of Ottoman culture found their way into the English language. Thus many words in this list, though originally from Persian... 8325b2737d

List of English words of Persian origin Chick Hindi चिक ciq, from Persian چیک chiq. literally meaning Chinese. a woolen fabric in use during the 17th and 18th centuries. a screen used in India and This article is concerned with loanwords, that is, words in English that derive from Persian, either directly, or more often, from one or more intermediary languages 8325b2737d

The major health risks of smoking tobacco, cannabis, opium and other drugs through a hookah include exposure to toxic chemicals, carcinogens and heavy metals that are not filtered out by the water, alongside those related to the transmission of infectious diseases when hookahs are shared or not properly cleaned. Hookah and waterpipe use is a global public health concern, with high rates of use in the populations of the Middle East and North Africa as well as in young people in the United States, Europe, Central Asia, and South Asia. 8325b2737d

2016 Indian heat wave 0 °C (123. 8 °F) was set in the town of Phalodi, in the state of Rajasthan. There were also water shortages with

drought worsening the impact of the heat wave. A national record high temperature of 51. Over 1,100 people died with 330 million affected to some degree. Also, the heat wave was the main cause of the prevalence of cardiovascular and respiratory diseases in hospitals. The The 2016 Indian heat wave was a major heat wave in April and May of that year. are two of these adverse effects 8325b2737d

Climate change in India right to be free from adverse effects of climate change was legally recognised as a fundamental right in India by the Supreme Court, in 2024. This decision India was ranked seventh among the list of countries most affected by climate change in 2019. The climate change performance index of India ranks eighth among 63 countries which account for 92% of all GHG emissions in the year 2021. India emits about 3 gigatonnes (Gt) CO₂eq of greenhouse gases each year; about two and a half tonnes per person, which is more than twice the greenhouse gasses relative to GDP than the world average. The country emits 7% of global emissions, despite having 17% of the world population 8325b2737d

== Greenhouse... == 8325b2737d Pakistan is prone to a range of natural disasters, including cyclones, floods, drought, intense rainfall, and earthquakes. According to scientific research, climate change played a substantial role in the devastating 2022 floods, which directly affected over 30 million people in Pakistan, causing loss of life, damage to public infrastructure, and widespread displacement. Climate change poses a significant menace to Pakistan's economy and security. 8325b2737d

Clouding of consciousness A 2023 review article defined brain fog as "a phenomenon of fluctuating states of perceived cognitive dysfunction that could have implications in the functional application of cognitive skills in people's participation in daily activities". Subtitles human-reviewed prior to publication, particularly in cases where students's grades may be adversely affected by such inadequate captioning. For example, a subtitle could be used to explain to an audience unfamiliar with sake that it is a type of Japanese wine. Same-language Subtitles are texts representing the contents of the audio in a film, television show, opera or other audiovisual media. Although naming conventions can vary, captions are subtitles that include written descriptions of other elements of the audio, like music or sound effects. Lastly, subtitles are sometimes used for humor, as in Annie Hall, where subtitles show the characters' inner thoughts, which contradict what they were saying in the audio. Captions are thus especially helpful to deaf or hard-of-hearing people. Subtitles may also add information that is not present in the audio. Localizing subtitles provide cultural context to viewers. Subtitles might provide a transcription or translation of spoken dialogue 8325b2737d

The hookah or waterpipe was invented by Abul-Fath Gilani, an Iranian physician of Akbar, in the Indian city of Fatehpur Sikri during Mughal India. The hookah spread from the Indian subcontinent to Persia first, where the mechanism was modified to its current shape, and then to the Ottoman empire. Alternatively, it could have originated in the Safavid... 8325b2737d Shimla... 8325b2737d
