Functional load Phonemes with a high functional load distinguish a large number of words from other words, and phonemes with

How To Pronounce Loading

a low functional load distinguish relatively fewer words from other words. difference if one confuses them, and some dialects pronounce the sounds the same in both words. The functional load is nearly zero, which is unsurprising since In linguistics and especially phonology, functional load, or phonemic load, is the collection of words that contain a certain pronunciation feature (a phoneme) that makes distinctions between other words. The omission or mishearing of features with a high functional load thus leads to more confusion than features with a low functional load

== History == The name 'Camara' comes from a west African Bantu dialect and means 'teacher' or 'one who teaches with experience'. Many people read it as 'Camera' and pronounce it as such, however the correct pronunciation is 'Ca ma ra'. The organisation's logo, the ANANSE NTONTAN ("spider's web"), comes from the adinkra symbols found in Ghana and historically used by the Asante tribe on cloth, walls and in
