Development of Rebound began in late 1973, as one of several variations they produced in 1974 on the gameplay of the successful Pong (1972), Atari's first game and the fourth-ever arcade video game. Around the same time, Atari launched Kee Games, a subsidiary meant to produce clone games of Atari's products and act as a competitor in order to expand into more distribution channels in the same region than the industry typically supported. Kee's first game, released in March 1974, was Spike, a clone of Rebound, which added a "spike" button to the game that made the paddle jump up and attempt to bounce the ball downwards... 86b2fcedfb == History == 86b2fcedfb Asterisked (*) meanings, though found chiefly in the specified region, also have some currency in the other dialect; other definitions may be viewed by the other as Briticisms or Americanisms respectively. Gradient, constriction, and obstruction are streambed topography factors and are relatively consistent. Flow rate is dependent upon both seasonal variation in precipitation and snowmelt and upon release rates of upstream dams. 86b2fcedfb

Defibrillation Subsequently, the body's natural pacemaker in the sinoatrial node of the heart is able to re-establish normal sinus rhythm. A heart which is in asystole (flatline) cannot be restarted by defibrillation; it would be treated only by cardiopulmonary resuscitation (CPR) and medication, and then by cardioversion or defibrillation if it converts into a shockable rhythm. external defibrillators (AEDs), automate the diagnosis of treatable rhythms, meaning that lay responders or bystanders are able to use them successfully with Defibrillation is a treatment for life-threatening cardiac arrhythmias, specifically ventricular fibrillation (V-Fib) and non-perfusing ventricular tachycardia (V-Tach). Defibrillation delivers a dose of electric current (often called a counter-shock) to the heart. A device that administers defibrillation is called a defibrillator. Although not fully understood, this process depolarizes a large amount of the heart muscle, ending the arrhythmia 86b2fcedfb
