

Ameba That Eats Brain

The genus *Naegleria* was established by Alexis Alexeieff in 1912, who grouped the flagellate amoeba. He coined the term *Naegleria* after Kurt Nägler, who researched amoebae. It is typically found in warm freshwater bodies such as lakes, rivers, hot springs, warm water discharge from industrial or power plants, geothermal well water, poorly maintained or minimally chlorinated swimming pools with residual chlorine levels under 0.5 g/m³, water heaters, soil, and pipes connected to tap water. It can exist in either an amoeboid or temporary flagellate stage. == Majority first, objectivity second? WTF? (read it patiently please) == The species was named after Malcolm Fowler, an Australian pathologist at Adelaide Children's... == Main characters ==
