Wendy Vogel writes for Artforum.com, "Like her experimental predecessors, West forgoes narrative cohesion in favor of creating jumpy cuts and abstract visual collages--splicing, rolling, and drenching the celluloid using materials from Mylar tape to pickle juice, whiskey to candle smoke." Christopher Bedford wrote in Artforum on her work, "sexy, whimsical, painting-scale DVD projections walk that elusive line between pictorial modes with deftness, wit, and airy originality." Joanna Kleinberg wrote on her work in Frieze "the intermingling of materiality, feeling and identity creates a wild blend of synaesthetic experience wherein the substances of life literally and figuratively colour the film." One of the earliest writers to mention an invisible ink is Aeneas Tacticus, in the 4th century BC. He mentions it in discussing how to survive under siege but does not indicate the type of ink to be used. This was part of his list of the 20 different methods of secret communications in a book called On the Defense of Fortifications. One of the techniques that involved steganography involved puncturing a tiny hole above or below letters in a document to spell out a secret message. This

did not include an invisible ink but the Germans improved on the method during World War I and World War II. They used invisible ink and microdots instead of pinpricks. 70bc45ff30

History of animation Hand-drawn animation, which mostly consisted of a succession of still images painted on cels, was the dominant technique of the 20th century and became known as traditional animation. Between 1895 and 1920, during the rise of the cinematic industry, several different animation techniques were developed or re-invented, including stop-motion with objects, puppets, clay or cutouts, and drawn or painted animation. Outer Space (Belgium/USA 1965, feature directed by Ray Goossens) West and Soda (Italy 1965, first feature by Bruno Bozzetto) Ralph Bakshi thought that the Animation, the method for creating moving pictures from still images, has an early history and a modern history that began with the advent of celluloid film in 1888 70bc45ff30

== Biography == Over millennia, through the process of natural selection, plants have evolved the means to produce a vast and complicated array of chemical compounds to deter herbivores. Tannin, for example, is a defensive compound that emerged relatively early in the evolutionary history of plants, while more complex molecules such as polyacetylenes are found in younger groups of plants such as the Asterales. Many of the known plant defense compounds primarily defend against consumption by insects, though other animals, including humans, that consume such plants may also experience negative effects, ranging from mild discomfort to death.
