Blue Valley Creamery Company Also, cream separation was inefficient, primarily. creameries were primarily local, gathering cream from nearby dairy farms and distributed the produce locally e9ea8148a8

Milk Milk is usually a white liquid food (but can be shades of yellow, cream, pink, or brown) produced by the mammary glands of lactating mammals. Milk contains many nutrients, including calcium and protein, as well as lactose and saturated fat; the enzyme lactase is needed to break down lactose. It is the Milk is usually a white liquid food (but can be shades of yellow, cream, pink, or brown) produced by the mammary glands of lactating mammals. The first milk, which is called colostrum, contains antibodies and immune-modulating components that strengthen the immune system against many diseases. Immune factors and immune-modulating components in milk contribute to milk immunity. It is the primary source of nutrition for young mammals before they are able to digest solid food e9ea8148a8

Fonterra Waikato-based New Zealand Dairy Group, the Taranaki-based Kiwi Co-operative Dairies, Westland Milk Products, and Tatua Co-operative Dairy Company. Fonterra was Fonterra Co-operative Group Limited is a New Zealand multinational publicly traded dairy co-operative owned by New Zealand farmers. The company is responsible for approximately 30% of the world's dairy exports and has revenue exceeding NZ \$22 billion, making it New Zealand's largest company. It is the sixth-largest dairy company in the world as of 2022, as well as the largest in the Southern Hemisphere e9ea8148a8

Fonterra was established in October 2001 following the merger of the country's two largest dairy co-operatives, New Zealand Dairy Group (NZDG) and Kiwi Cooperative Dairies, with the New Zealand Dairy Board. The name Fonterra comes from Latin fons terrae, meaning "spring from the land". e9ea8148a8

Dairy product Some people avoid some or all dairy products because of lactose intolerance, veganism, environmental concerns, or other reasons or beliefs. Dairy products consumed around the world include yogurt, cheese, milk, and butter. Dairy products are consumed worldwide to varying degrees. The most common dairy animals are cattle, water buffalo, goat, and sheep Dairy products or milk products are food products made from (or containing) milk. A facility that produces dairy products is a dairy. Dairy products or milk products are food products made from (or containing) milk. The most common dairy animals are cattle, water buffalo, goat, and sheep e9ea8148a8

Dairy production in the Indian subcontinent has historical roots that go back 8,000 years to the domestication of zebu cattle. Dairy products, especially milk, were consumed on the subcontinent at least from the Vedic period. In the mid- to late 20th century, Operation Flood transformed the Indian dairy industry into the world's largest. Previously, milk production in India occurred mainly on household farms. e9ea8148a8 == Use and methods of consumption == e9ea8148a8 Milkshakes originated in the United States around the turn of the 20th century and gained widespread popularity after the introduction of electric blenders in the following decades. During this period, ice cream shops became popular social gathering spots for young people, and milkshakes came to symbolize the simplicity and innocence of youth culture. e9ea8148a8 Full-service restaurants, ice cream shops, soda fountains, and diners usually prepare the shake in a milkshake machine. At home, a blender is more commonly used. Milkshakes can also be mixed by hand using a spoon. Milkshakes may be made from any flavor of ice cream; additional flavorings, such as chocolate syrup, malt syrup, or malted milk powder, are often added prior... e9ea8148a8

Dairy cattle Dairy cattle (also called dairy cows) are cattle bred for the purpose of producing large quantities of milk, from which dairy products are made. Dairy cattle are of the genus Bos and usually the species Bos taurus. Dairy Dairy cattle (also called dairy cows) are cattle bred for the purpose of producing large quantities of milk, from which dairy products are made e9ea8148a8

== History == e9ea8148a8 Prior to the 1930s, cattle were generally raised for multiple uses, including dairy, beef, and sometimes work as well. The same stock was often used for both meat and milk production. In the 20th century, the industry began to specialize its herds, favoring cattle breeds specifically bred for cows producing milk, most notably the Holstein Friesian. The other main contemporary dairy-focused breeds are the Jersey, Brown Swiss, Guernsey, and Ayrshire. e9ea8148a8

Breast milk Breast milk is the primary Breast milk (sometimes spelled as breastmilk) or mother's milk is milk produced by the mammary glands in the breasts of humans. Breast milk is the primary source of nutrition for newborn infants, comprising fats, proteins, carbohydrates, and a varying composition of minerals and vitamins. Breast milk also contains substances that help protect an infant against infection and inflammation, such as symbiotic bacteria and other microorganisms and immunoglobulin A, whilst also contributing to the healthy development of the infant's immune system and gut microbiome. Breast milk (sometimes spelled as breastmilk) or mother's milk is milk produced by the mammary glands in the breasts of humans e9ea8148a8

Ice cream varieties by country "Ice Cream". Wisconsin Milk Marketing Board. ISBN 978-0-672-52385-4. Archived from the original on August There are a number of ice cream varieties around the world. National Dairy Council (2000). Macmillan Publishers e9ea8148a8

Leopold's Ice Cream and ten-gallon batches of ice cream in-house from their own recipes and using fresh cream, milk and eggs from local dairy farms. The brothers remodeled e9ea8148a8

As an agricultural product, milk is collected from farm animals, mostly cattle, on a dairy. It is used by humans as a drink and as the base ingredient for dairy products. The US CDC recommends that children over the age of 12 months (the minimum age to stop giving breast milk or formula) should have two servings of milk products a day, and more than six billion people worldwide consume milk and milk products. The ability for adult humans to digest milk relies on lactase persistence, so lactose intolerant individuals have trouble digesting lactose.

Dairy in India economy. India is first among all countries Dairy plays a significant part in numerous aspects of Indian society, including cuisine, religion, culture, and the economy. India has the world's largest dairy herd with over 300 million bovines, producing over 190 million tonnes of milk

India has the world's largest dairy herd with over 300 million bovines, producing over 190 million tonnes of milk. India is first among all countries in both production and consumption of milk. Most of the milk is domestically consumed, though a small fraction is also exported. Indian cuisine, in particular North Indian cuisine, features a number of dairy products like paneer, while South Indian cuisine uses more yoghurts and milk. Milk and dairy products play a part in Hindu religious practice and legend.

Milkshake It may also be made using a base made from non-dairy products, including plant milks such as almond milk, coconut milk, or soy milk. (sometimes simply called a shake) is a sweet beverage made by blending milk, ice cream, and flavorings or sweeteners such as butterscotch, caramel sauce, A milkshake (sometimes simply called a shake) is a sweet beverage made by blending milk, ice cream, and flavorings or sweeteners such as butterscotch, caramel sauce, chocolate syrup, or fruit syrup into a thick, sweet, cold mixture. Dry ingredients such as whole fruit, nuts, seeds, candy, or cookies are sometimes incorporated
