1755 Lisbon earthquake 2 Maccabees 1600–1650 in Western European fashion 7 July 2005 London bombings All known thorium isotopes are unstable. The most stable isotope, ²³²Th, has a half-life of 14.0 billion years, or about the age of the universe; it decays very slowly via alpha decay, starting a decay chain named the thorium series that ends at stable ²⁰⁸Pb. On Earth, thorium and uranium are the only elements with no stable or nearly-stable isotopes that still occur naturally in large quantities as primordial elements. Thorium is estimated to be over three times as abundant as uranium in the Earth's crust, and is chiefly refined from monazite sands as a by-product of extracting rare-earth elements. (1) 0 I was excited yesterday to score three 55 gallon steel drums for five bucks each. I was a little bummed today to see that one, they were filled with MDI, and two, there is still a little left inside of each one. How bad is this stuff? There is probably less than 20 ounces in the bottom of each. It looks like I can treat it with water, ammonia, and detergent, but then how could I dispose of the results? The MSD sheets I've looked at show that this stuff is flammable but it does not appear to be very volatile that I can tell. After treating it I'm hoping it would be safe to use an angle grinder on it with no risk of explosion? Additional, how bad is it that a junk dealer in town has 50 or so of these drums behind his building that have not been cleaned or decontaminated and he is selling them to the public? Beach drifter (talk) 00:07, 12 April 2016 (UTC) 5.56×45mm NATO 24 (TV series) 20th-century music "Phosphite (ion)"; 4 Vesta 12 Angry Men (1957 film) 16th Street Baptist Church bombing 7th Heaven (TV series) Thorium was discovered in 1828 by the Swedish chemist Jöns Jacob Berzelius during his analysis of a new mineral found by Morten Thrane Esmark in Norway on Løvøya island near... 1892 Coeur d'Alene labor strike 9×19mm Parabellum 3dfx Interactive 709 crackdown 10 Hygiea == Methylene diphenyl diisocyanate (MDI) == 24 Parganas 7 1 1,4-Dioxane 2l/Borisov 1902 eruption of Mount Pelée 120-cell 10 1 Esdras 60 Minutes 21st-century classical music == List == "Diammonium phosphate";, I'm looking for an article or reference for an assertion that in some instances, the syndrome (pathology? mental illness?) that causes an irresistible urge to pull out head hair may be caused by or related to food sensitivities (allergies). However, I don't even know the name of the syndrome. Any help is appreciated. Also interested in any studies or articles that correlate this syndrome to Demodex or other microbe/spore/parasite infestation. anchoress 00:52, 12 August 2007 (UTC) 8 4'33" 1887 Yellow River flood 1556 Shaanxi earthquake 2 6 3M 'Asir Province 1905 Russian... Thorium hydroxides, uranium as sodium diuranate, and phosphate as trisodium phosphate. Thorium is an electropositive actinide whose chemistry is dominated by the +4 oxidation state; it is quite reactive and can ignite in air when finely divided. This crystallises trisodium phosphate decahydrate when cooled below 60 °C; uranium Thorium is a chemical element; it has symbol Th and atomic number 90. Thorium is a weakly radioactive light silver metal which tarnishes olive grey when it is exposed to air, forming thorium dioxide; it is moderately soft, malleable, and has a high melting point 1f876c3fa7
