

# Cretinism Is Caused By

== Signs and symptoms == Iodine is an essential dietary mineral for neurodevelopment among children. The thyroid hormones thyroxine and triiodothyronine contain iodine. In areas with little iodine in the diet, typically remote inland areas where no marine foods are eaten, deficiency is common. It is common in mountainous regions where food is grown in iodine-poor soil. Causes of congenital hypothyroidism include iodine deficiency, developmental defect in the thyroid gland or the hypothalamus/pituitary either due to a genetic defect or an unknown cause, or dysfunction of the thyroid gland or the thyroid hormone. The source of the CH can occur at the level of the hypothalamus/pituitary gland (central CH) or the thyroid gland (primary CH). In both cases, the initial newborn screening will reflect low free thyroid hormone (fT4) levels, with elevated thyroid stimulating hormone (TSH) in primary CH and low/normal TSH in central CH. == Early life ==

Class of Nuke 'Em High Directed by Richard W. New York holographer Jason Sapan created the laser effects. gang of the school, called "The Cretins," who were originally part of the honor society, torments the school, and it is implied that they have been turned Class of Nuke 'Em High (also known as Atomic High School) is a 1986 American science-fiction horror comedy film produced and distributed by Troma Entertainment. Haines and Lloyd Kaufman (the latter under the pseudonym "Samuel Weil"), the film follows a high school impacted by radioactive drugs obtained from a nearby nuclear power plant

In developed countries, thyroid function testing of newborns has assured that in those affected, treatment with the synthetic thyroid hormone thyroxine is begun promptly. This screening and treatment successfully cures the disease.

Iodine deficiency syndrome, previously known as cretinism, is a condition associated with iodine deficiency and goiter, commonly characterized by mental deficiency, deafness Iodine deficiency is a lack of the trace element iodine, an essential nutrient in the diet. Iodine deficiency is an important global health issue, especially for fertile and pregnant women. It is also a preventable cause of intellectual disability. It may result in metabolic problems such as goiter, sometimes as an endemic goiter as well as congenital iodine deficiency syndrome due to untreated congenital hypothyroidism, which results in developmental delays and other health problems

Hetzel was born in London to Elinor Hetzel (née Watt) and Kenneth Stuart Hetzel, an anaesthetist. Hetzel's parents were originally from South Australia but in London at the time while Kenneth worked at the University College Hospital. They returned to Adelaide in 1925. There he, along with his brother Peter (born 1924), was schooled at King's College and St Peter's College, Adelaide.

Forgotten Sunrise demos and rare tracks. Their sound has been described as "outdustrial" or "deathbeat" and compared to a mixture of Dead Can Dance, David Lynch, Katatonia, Celtic Frost and Clock DVA. As 20 years also Forgotten Sunrise is an Estonian industrial band founded in Tallinn, the capital of Estonia. In 2013, the third full-length album "Cretinism" was released by the legendary German record label Out Of Line

Congenital hypothyroidism Infants born with congenital hypothyroidism may be asymptomatic, or may display mild symptoms that go unrecognized as a problem. intellectual disability. Infants born with congenital hypothyroidism may be asymptomatic Congenital hypothyroidism (CH) is a thyroid hormone deficiency present at birth. Untreated congenital hypothyroidism is also referred to as cretinism. Untreated congenital hypothyroidism is also referred to as cretinism. If untreated soon after birth, severe congenital hypothyroidism can lead to growth failure and permanent intellectual disability. Significant deficiency may cause excessive sleeping, reduced interest in nursing, poor muscle tone, low or hoarse cry, infrequent bowel movements, significant jaundice, and low body temperature

Peter Pharoah was born in Ranchi, in the Indian state of Jharkhand, in May 1934. He went to school in Lovedale and Sanawar. Tromaville High School in New Jersey is located next to a nuclear power plant. A nuclear accident at the power plant is covered up by plant owner, Mr. Paley, who does not want the facility shut down by the safety commission. The accident causes a radioactive water leak which ends up gruesomely killing a student named Dewey at the school after the tainted water reaches the drinking fountain. The gang of the school, called "The Cretins," who were originally part of the honor society, torments the school, and it is implied that they have been turned into violent psychopaths by the runoff from the plant. They pick leaves from a radioactive marijuana plant located in the yard of the nuclear plant and sell it to Eddie for \$10. Symptoms may include: goiter, poor length growth in infants, reduced adult stature, thickened skin, hair loss, enlarged tongue, a protruding abdomen, delayed bone maturation and puberty in children, mental deterioration, neurological impairment, impeded ovulation, and infertility in adults. Kocher was the first Swiss citizen and first surgeon to ever receive a Nobel Prize in Medicine. He was considered a pioneer and leader in the field of surgery in his time. In 2013 Eastman expressed concern that IDD may be affecting Australian children's ability to perform at school and reiterated that view in 2016. While the initial focus was mostly on indigenous children, he latterly expanded it to include all children. == Early life and education == At his "indoor bikini beach party" that...

Congenital hypothyroidism due to iodine deficiency com. Definition of Cretinism". Consistent with the broader category of congenital hypothyroidism, this subtype also manifests as what was historically termed cretinism if left untreated. Iodine deficiency is one cause of underactive thyroid function at birth, called congenital hypothyroidism. Retrieved 5 October 2019. Archived from the original on 11 September 2017. Cretinism: Congenital Congenital hypothyroidism due to iodine deficiency (ICD-11), or congenital iodine deficiency syndrome (CIDS, ICD-10), is a medical condition present at birth marked by impaired physical and mental development, due to insufficient thyroid hormone production (hypothyroidism) caused by insufficient dietary iodine during pregnancy. Eastman was born on 30 March 1940 in Narrandera, New South Wales. He was the fourth child of Albert Edward and Margaret Mary Eastman. He gained his primary education at Woodburn and Lismore in Northern NSW and secondary schooling at Marist Brothers Boarding School in Bowral/ Mittagong, NSW. He studied medicine at the University of... == Signs and symptoms == Hetzel studied medicine at the University of Adelaide from 1940 to 1944. As a medical student, he was granted

reserved occupation status during World War II. He later applied to join the Royal Australian Air Force as a medical officer but was denied on grounds of being unfit due to a long bout of pulmonary tuberculosis in 1945. 10a9dabd69 == Early life and education == 10a9dabd69 == Early life and personal life == 10a9dabd69

Emil Theodor Kocher mixed, some people asserted that goitre and cretinism were different stages of same disease and that cretinism would have occurred independently of the removal Emil Theodor Kocher (25 August 1841 – 27 July 1917) was a Swiss physician and medical researcher who received the 1909 Nobel Prize in Physiology or Medicine for his work in the physiology, pathology and surgery of the thyroid. Among his many accomplishments are the introduction and promotion of aseptic surgery and scientific methods in surgery, specifically reducing the mortality of thyroidectomies below 1% in his operations 10a9dabd69

Prevention includes adding small amounts of iodine to table salt, a product known as iodized salt. In areas of deficiency, iodine compounds have also been added to other foodstuffs, such as flour, water, and milk. Seafood is also a well known source of iodine. 10a9dabd69

Creswell Eastman Even mild Iodine deficiency can cause goitres and decreased IQ. For his work in remote areas of China, he was dubbed the "man who saved a million brains". Severe iodine deficiency can likely lead to cretinism if it occurs in a child's early Creswell John Eastman (30 March 1940 – 17 May 2025) was an Australian endocrinologist who was the Clinical Professor of Medicine at Sydney University Medical School, Principal of the Sydney Thyroid Clinic and Consultant Emeritus to the Westmead Hospital. Eastman directed or conducted research and public health projects into elimination of iodine deficiency disorders (IDD) in Malaysia, Indonesia, Laos, Cambodia, Thailand, several Pacific Islands, Hong Kong, China and Tibet and Australia 10a9dabd69

Myxedema that in the myxedematous type of cretinism treatment with iodine normalizes thyroid function provided that the treatment is begun early in the postnatal period Myxedema (British English: myxoedema) is a term used synonymously with severe hypothyroidism, but also to describe a dermatological change that can occur in hypothyroidism and (rare) paradoxical cases of hyperthyroidism. Myxedema can also occur in Hashimoto thyroiditis and other long-standing forms of hypothyroidism. In this latter sense, myxedema refers to deposition of glycosaminoglycans in the dermis, which results in swelling of the affected area. One manifestation of myxedema occurring in the lower limb is pretibial myxedema, a hallmark of Graves' disease, an autoimmune form of hyperthyroidism 10a9dabd69

Peter Pharoah He was known for his work on people with cretinism (as the condition was then known) in Papua New Guinea and cerebral palsy in the United Kingdom. child-bearing age and found out that cretinism (as congenital iodine deficiency syndrome was known at the time) was caused by iodine deficiency during pregnancy; Peter Oswald Derrick Pharoah (19 May 1934 – 23 October 2021) was a British public health professor at the University of Liverpool from 1979 until 1997 10a9dabd69
