

Intensely Itchy Feet At Night

The festival was established in 2001. The first year it took place as a rather small event featuring six artists on each of the two days of the festival. For 2002's festival the Salzburgring, normally used as a motor-bike racetrack, was selected. The Italian biologists Giovanni Cosimo Bonomo and Diacinto Cestoni showed in the 17th century that scabies is caused by *Sarcoptes scabiei*; this discovery of the itch mite in 1687 marked scabies as the first disease of humans with a known microscopic causative agent. The disease produces intense, itchy skin rashes when the impregnated female tunnels into the stratum corneum of the skin and deposits eggs in the burrow. The larvae, which hatch in three to 10 days, move about on the skin, moult into a nymphal stage, and then mature into adult mites. The adult mites live three to four weeks in the host's skin.

Sarcoptes scabiei Other mammals can be infested with different varieties of the mite, including wild and domesticated dogs and cats (in which it is one cause of mange), ungulates, wild boars, bovids, wombats, koalas, and great apes. Humans become infested by *Sarcoptes scabiei* var. *hominis* with a known microscopic causative agent. The disease produces intense, itchy skin rashes when the impregnated female tunnels into the stratum corneum. *Sarcoptes scabiei* (; sar-KOP-teez SKAY-bee-eye) or the itch mite is a parasitic mite found in all parts of the world that burrows into skin and causes scabies. *hominis*, which is a particular public health problem in crowded settings such as care homes, schools, refugee camps, prisons, and hospitals

Bob's Burgers Itchy & Scratchy". The show premiered on January 9, 2011. It is centered on the Belcher family – parents Bob and Linda and their three children, Tina, Gene, and Louise – who run a burger restaurant in New Jersey and often go on adventures of many kinds. The series is animated by Bento Box Entertainment. Bob's Burgers is produced by Wilo Productions and Buck & Millie Productions in association with 20th Television Animation. The series was conceived by Bouchard after he developed Home Movies. Cartoon Women's History poster in Lisa's bedroom in the episode "Bart vs. the Simpsons World", the third segment of "Treehouse of Horror Bob's Burgers is an American animated sitcom created by Loren Bouchard for the Fox Broadcasting Company

Intensely Itchy Feet At Night

Bed bug bites are caused primarily by two species of insects: *Cimex lectularius* (the common bed bug) and *Cimex hemipterus*, found primarily in the tropics. Their size ranges between 1 and 7 mm. They spread by crawling between nearby locations or by being carried within personal items. Infestation is rarely due to a lack of hygiene but is more common in high-density areas. Diagnosis involves both finding the bugs and the occurrence of compatible symptoms. Bed bugs spend much of their time in dark, hidden locations like mattress seams, or cracks in a wall. While reviews for the first season were mixed, feedback for subsequent seasons has been more positive. The series premiere, "Human Flesh", drew in 9.39 million viewers, making it the highest-rated series premiere of the season and finishing ninth in the ratings for the week it aired. Since then, the series has grown to be a critical and cultural success. In 2013, TV Guide ranked Bob's Burgers as one of the 60 Greatest TV Cartoons of All Time. The series has been nominated for several awards, including the Emmy Award for Outstanding Animated Program fifteen consecutive times (2012–2026), winning in 2014 and 2017...

How the Grinch Stole Christmas (2000 film) The supporting cast includes Jeffrey Tambor, Christine Baranski, Bill Irwin, Taylor Momsen and Molly Shannon. Carrey complained that the costume was itchy, that he could not breathe out of his prosthetic nose and that he could Dr. It was the first of two Dr. Seuss. Narrated by Anthony Hopkins, the film stars Jim Carrey as the Grinch, a misanthropic green creature living on Mount Crumpit, who despises Christmas and the joyful residents of Whoville and sets out to sabotage their holiday celebration. green, and sewn onto a spandex suit. Seuss' How the Grinch Stole Christmas is a 2000 American Christmas comedy film directed by Ron Howard and written by Jeffrey Price and Peter S. Seuss books to be adapted into a live-action feature film, and the second adaptation of the book following the 1966 animated TV special. Seaman, loosely based on the 1957 children's book of the same name by Dr

Magical cicada species spend around 99.5% of their lives underground in an immature state called a nymph. While underground, the nymphs feed on xylem fluids from the roots of broadleaf forest trees in the eastern United States. In the spring of their 13th or 17th year, mature cicada nymphs emerge between late April and early June (depending on latitude), synchronously and in tremendous numbers. The adults are active for only about four to six weeks after the unusually prolonged developmental phase.

Fantasia (1940 film) admired the animation in Night on Bald Mountain, and made the first appearance of Devil Flanders resemble Chernabog. The episode "Itchy & Scratchy Land" references Fantasia is a 1940 American animated musical anthology film produced by Walt Disney Productions, with story direction by Joe Grant and Dick Huemer and production supervision by Walt Disney and Ben Sharpsteen. Music critic and composer Deems Taylor acts as the film's Master of Ceremonies who

Scabies 'to scratch'. The word is from Latin: scabere, lit. Scratching may cause skin breakdown and an additional bacterial infection in the skin. The most common symptoms are severe itchiness and a pimple-like rash. These symptoms can be present across most of the body or just in certain areas such as the wrists, between fingers, or along the waistline. Occasionally, tiny burrows may appear on the skin. Scabies (, SKAY-beez; also sometimes known as the seven-year itch) is a contagious human skin infestation by the tiny (0.45 mm) mite *Sarcoptes scabiei*, variety *hominis*. It is a particular public health problem in crowded settings such as care homes, schools, refugee camps, prisons, and hospitals. The itch is often worse at night. In a first-ever infection, the infected person usually develops symptoms within three weeks. During a second infection, symptoms may begin within 24 hours. Occasionally, tiny burrows may appear on the skin from eggs that are about to hatch.

Disney settled on the film's concept in 1938 as work neared completion on *The Sorcerer's Apprentice*, originally an elaborate Silly Symphony cartoon designed as a comeback role for Mickey Mouse, who had declined in popularity. As production costs surpassed what the short could earn, Disney decided to include it in a feature-length film of multiple segments set to classical pieces with Stokowski and Taylor as collaborators. The soundtrack was recorded using multiple audio channels and reproduced with Fantasound, a pioneering sound system developed by Disney and RCA that made *Fantasia* the first commercial film shown in stereo and a precursor to surround sound.

Koyaanisqatsi runs for 86 minutes and comprises a montage of visuals accompanied by minimal music, without narration, dialogue, or intertitles. The title comes from the Hopi word *koyaanisqatsi*, meaning "life out of balance". It is the first film in the *Qatsi* trilogy, which was followed by *Powaqqatsi* (1988) and *Naqoyqatsi* (2002). The trilogy depicts different aspects of the relationship between humans, nature and technology. *Koyaanisqatsi* is the best known of the trilogy and is considered a cult film.

Treatment... Prevention of atopic dermatitis is typically with essential fatty acids, and may be treated with moisturizers and steroid creams. The steroid creams should generally be of mid to high strength and used for less than two weeks at a time, as side effects can occur. Antibiotics may be required if there are signs of skin infection...

Periodical cicadas Although they are sometimes called "locusts", this is a misnomer, as cicadas belong to the taxonomic order Hemiptera (true bugs), suborder Auchenorrhyncha, while locusts are grasshoppers belonging to the order Orthoptera. They are called periodical because nearly all individuals in a local population are developmentally synchronized and emerge in the same year. trails that were overhung by oak trees, they would end up with itchy welts the following day. Magicicada belongs to the cicada tribe *Lamotialnini*, a group of genera with representatives in Australia, Africa, and Asia, as well as the Americas. At that

time, the oak itch mite had been recorded as being a The term periodical cicada is commonly used to refer to any of the seven species of the genus Magicicada of eastern North America, the 13- and 17-year cicadas a1ff9012c2

The 2003 festival was both a success and a disappointment. One of the major Austrian concert organizers-promoters and business rivals of Musicnet, Wiesen, who are also in charge of famous Austrian festivals like the Jazz Fest, Forestglade and Two Days A Week, decided to have Metallica perform in the stadium of Salzburg, only... a1ff9012c2

Bed bug Symptoms may take between minutes to days to appear and itchiness is generally present. Some individuals may feel tired or have a fever Bed bugs are insects from the genus Cimex, which are parasites that feed on blood, usually at night. Bed bug bites may lead to skin changes ranging from small areas of redness to prominent blisters. Their bites can result in a number of health issues, including skin rashes, psychological effects, and allergic symptoms. Their bites are not known to transmit any infectious disease. Symptoms may take between minutes to days to appear and itchiness is generally present. Complications may rarely include areas of dead skin or vasculitis. prominent blisters. Typically, uncovered areas of the body are affected. Some individuals may feel tired or have a fever a1ff9012c2

The exact cause of the condition is often unclear. Cases may involve a combination of allergy and poor venous return. The type of dermatitis is generally determined by the person's history and the location of the rash. For example, irritant dermatitis often occurs on the hands of those who frequently get them wet. Allergic contact dermatitis occurs upon exposure to an allergen, causing a hypersensitivity reaction in the skin. a1ff9012c2
