On average, university students get 6 to 6.9 hours of

sleep every night. Based on the Treatment for Sleep Disorders, the recommended amount of sleep needed for college students is around 8 hours. According to Stanford University's Department for the Diagnosis, 68% of college students are not getting the sleep they need. The main causes of sleep deprivation include poor sleep hygiene, biology, use of technology, and use of drugs. The effects can damage the student's GPA, relationships, focus and memory, and emotional and mental health. Students may face depression, anxiety, and difficulty maintaining their relationships in a healthy manner. There are many possible solutions to combat sleep deprivation including improving bedroom environment, reducing exposure to blue light, and taking naps during the day. f0bed2b149
