Catcher In addition to this primary duty, the catcher is also called upon to master many other skills in order to field the position well. Because a ball striking the throat may cave in the windpipe, throat protectors are required in almost all youth-baseball games, Catcher is a position in baseball and softball. When a batter takes their turn to hit, the catcher crouches behind home plate, in front of the (home) umpire and receives the ball from the pitcher. The role of the catcher is similar to that of the wicket-keeper in cricket. to protect the throat f31bde07ab

Positioned behind home plate and facing toward the outfield, the catcher can see the whole field and is therefore in the best position to direct and lead the other players in a defensive play. The catcher typically calls for pitches using PitchCom, or hand signals. The calls are based on the pitcher's mechanics and strengths, as well as the batter's tendencies and weaknesses. Essentially, the catcher controls what happens during the game when the ball is not "in play". Foul tips, bouncing balls in the dirt and contact with runners during plays at the plate are all

events to be handled by the catcher, necessitating the use of protective equipment. This includes a mask, chest and throat protectors, shin guards, and a heavily padded catcher's mitt. Though rare, some chest protectors may extend... f31bde07ab == History of lacrosse sticks == f31bde07ab

Talk box Typically, a talk box directs sound from the instrument into the musician's mouth by means of a plastic tube adjacent to a vocal microphone. Instead of a throat microphone modulating a guitar A talk box (also spelled talkbox and talk-box) is an effects unit that allows musicians to modify the sound of a musical instrument by shaping the frequency content of the sound and to apply speech sounds (in the same way as singing) onto the sounds of the instrument. using the same principle of the throat as a filter was the Sonovox, invented by Gilbert Wright in 1939. The musician controls the modification of the instrument's sound by changing the shape of the mouth, "vocalizing" the instrument's output into a microphone f31bde07ab
