Ptosis (eyelid) Myogenic ptosis Ptosis, also known as blepharoptosis, is a drooping or falling of the upper eyelid. If severe enough and left untreated, the drooping eyelid can cause other conditions, such as amblyopia or astigmatism, so it is especially important to treat the disorder in children before it can interfere with vision development. This condition is sometimes called "lazy eye", but that term normally refers to the condition amblyopia. ptosis, which includes oculomotor nerve palsy, Horner's syndrome, Marcus Gunn jaw winking syndrome and third cranial nerve misdirection ffbf4da42
