Jesusland map presidential election that satirizes the red/blue states scheme by dividing the United States and Canada into "The United States of Canada" and "Jesusland". S. The map implies the existence of a fundamental political divide between contiguous northern and southern regions of North America, the former including both the socially liberal Canada and the West Coast, Northeastern, and Upper Midwestern U. states, and suggests that these states are closer in spirit to Canada than to the more conservative regions of their own country, which are characterized by the influence of Christian fundamentalism in their political and popular culture. The map implies the existence of a fundamental political divide between The Jesusland map is an Internet meme created shortly after the 2004 U. Slate also covered the image and posited that it might be the reason the Canadian immigration website received six times its usual page views the day after the 2004 election. The classification hierarchy used in the 1916 publication of the American Association of Geographers was division/province/section/subsection. The use of province in this hierarchy undoubtedly confounded the effort to develop a physiographical map consistent across the North American continent since Canada used province as the term for its first-level political subdivision. Province in Canada is a loose analogy for state in the US, and obviously would create great confusion if the same word was used in two vastly different geographical classifications. As late as 1914, the terminology used by an AAG publication used the term "natural region" as the basic denomination of physiography. That work showed 22 examples of how geographers had published works classifying North America into what had been defined... The region was once referred to as the Solid South, due to its large consistent support for Democrats in all elective offices from 1877 to 1964. As a result, its Congressmen gained seniority across many terms, thus enabling them to control many congressional committees. Following the passage of the Civil Rights Act of 1964 and Voting Rights Act of 1965, Southern states became more reliably Republican in presidential politics, while Northeastern states became more reliably Democratic. Studies show that some Southern whites during the 1960s shifted to the Republican Party, in part due to racial... == History == Officials are popularly elected at the federal, state and... In the United States, redistricting takes place in each state about every ten years, after the decennial census. It defines geographical boundaries, with each district within a state being geographically contiguous and having about the same number of state voters. The resulting map affects the elections of the state's members of the United States House of Representatives and the state legislative bodies. Redistricting has always been regarded as a political exercise. In most states, it is controlled by state legislatures and sometimes the governor. In some states the governor has no veto power over redistricting legislation, while in some states the veto override threshold is a simple majority. In some states, an independent commission is tasked with drawing...

Gerrymandering in the United States In the United States, redistricting Gerrymandering is the practice of setting boundaries of electoral districts to favor specific political interests within legislative bodies, often resulting in districts with convoluted, winding boundaries rather than compact areas. redistricting maps of Massachusetts set by Governor Elbridge Gerry noted that one of the districts looked like a mythical salamander. The term "gerrymandering" was coined in 1812 after a review of the redistricting maps of Massachusetts set by Governor Elbridge Gerry noted that one of the districts looked like a mythical salamander

The survey also indicates a rise in the diversity of firearm owners, with increased ownership rates among females and ethnic minorities compared to previous years. Representation in the United States Congress is geographically based. Moreover, the Founders explicitly designed the House of Representatives to be an institution that reflects local and regional concerns. These inescapable facts, and the actual history and actions of Congress itself, led many prominent historians, political scientists and geographers to attempt to investigate congressional elections, roll call voting, and other characteristics and behavior in their spatial context. Two of the greatest hindrances to this type of research were the unavailability of historical congressional district boundary maps and historical congressional election maps. To fill this gap in American historical

information, the National Endowment for the Humanities, in the late 1970s and 1980s... Advocates of gun control support increasingly restrictive regulations on gun ownership, while proponents of gun rights oppose such restrictions and often support the liberalization of gun ownership. These groups typically differ in their interpretations of the Second Amendment to the United States Constitution, as well as in their views on the role of firearms in public safety, their impact on public health, and their relationship to crime rates at both national and state levels.

Since the early 21st century, private firearm ownership in the United States has been steadily increasing, with a notable acceleration during and after 2020. One of the earliest preserved maps is from the Akkadian Empire (in modern Iraq) inscribed on a clay tablet and dated to 2300 BCE. By the 5th century BCE, Greeks were drawing maps of their known world, encompassing the Mediterranean Sea and most of Europe, North Africa, and the Middle East. Maps were important tools in the Age of Discovery, when mariners used them to explore new lands...

2020 United States redistricting cycle In all fifty states, various bodies redrew. The 2020 United States redistricting cycle took place following the completion of the 2020 United States census

Each of the 50 individual state governments has the power to make laws within its jurisdiction that are not granted to the federal government nor denied to the states in the U.S. Constitution. Each state also has a constitution following the pattern of the federal constitution but differing in details. Each has three branches: an executive branch headed by a governor, a legislative body, and a judicial branch. At the local level, governments are found in counties or county-equivalents, and beneath them individual municipalities, county, townships, school districts, and special districts.

Politics of the United States The three distinct branches share powers: Congress, which forms the legislative branch, a bicameral legislative body comprising the House of Representatives and the Senate; the executive branch, which is headed by the president of the United States, who serves as the country's head of state and government; and the judicial branch, composed of the Supreme Court and lower federal courts, and which exercises judicial power. In the United States, politics functions within a framework of a constitutional federal republic with a presidential system.
