Graded exercise therapy is a term used in varying ways by different services supporting people with ME/CFS. (NICE). In this guideline, graded exercise therapy is defined as first establishing an individual's baseline of achievable

exercise or physical activity, then making fixed incremental increases in the time spent being physically active. This definition of graded exercise therapy reflects the descriptions given in the evidence that was reviewed, and it is this approach that the guideline says should not be undertaken. c146f4b0e7 Introduction c146f4b0e7 Intro c146f4b0e7 Top 5 Tips for living with ME/CFS.
