The technique was described by Taiichi Ohno at Toyota Motor Corporation. Others at Toyota and elsewhere have criticized the five whys technique for being too basic and having an arbitrarily shallow depth as a root cause analysis tool (see § Criticism). 9f320b5860 Tops (later known as TV Tops), a 1981-84 comic by British publisher DC Thomson 9f320b5860 The aforementioned characters were designed while Jones attended college in the 1990s; he later founded the art collective Paper Rad with Jessica and Jacob Ciocci. The characters were featured in Jones' and the collective's animations and comics before the creator pitched a pilot in 2007 to Adult Swim featuring the trio, collaborating with PFFR and Williams Street. The network's executives referred Jones to Cartoon Network, who commissioned a series featuring the same characters. The series was produced in Adobe Flash, with around fifteen animators employed at Cartoon Network Studios and the co-production of Mirari Films. 9f320b5860 Fault management 9f320b5860

Eight disciplines problem solving Although it originally comprised eight stages, or 'disciplines', it was later augmented by an initial planning stage. It establishes a permanent corrective action

based on statistical analysis of the problem and on the origin of the problem by determining the root causes. Focused on product and process improvement, its purpose is to identify, correct, and eliminate recurring problems. Corrective and preventive action Non-conformance is identified after systematic evaluation and analysis of the root cause of the non-conformance. The Eight disciplines problem solving method, or 8D framework, can be used as an effective method of structuring a CAPA. Non-conformance may be a market complaint or customer complaint or failure of machinery or a quality management system, or misinterpretation of written instructions to carry out work. The corrective and preventive action is designed by a team that includes quality assurance personnel and personnel involved in the actual observation point of non-conformance. eliminate further

recurrence of such non-conformation. It must be systematically implemented and observed for its ability to eliminate further recurrence of such non-conformation. It is usually a set of actions, laws or regulations required by an organization to take in manufacturing, documentation, procedures, or systems to rectify and eliminate recurring non-conformance. The Eight disciplines problem solving method, or 8D framework, can be used as an effective method. Corrective and preventive action (CAPA or simply corrective action) consists of improvements to an organization's processes taken to eliminate causes of non-conformities or other undesirable situations 9f320b5860

Problem solving Similarly, one may distinguish formal or fact-based problems requiring psychometric intelligence, versus socio-emotional problems which depend on the changeable emotions of individuals or groups, such as tactful behavior, fashion, or gift choices. Problem solving is the process of achieving a goal by overcoming obstacles, a frequent part of most activities. Problems in need of solutions range from simple personal tasks (e. g. how to get from

point A to B) to complex issues in business and technical fields. Another classification of problem-solving tasks is into well-defined problems with specific obstacles and goals, and ill-defined problems in which the current situation is troublesome but it is not clear what kind of resolution to aim for.
