minutes, 4 seconds - Class 10 || Some Applications of Trigonometry Ex:-9.1 || Question no.10 Two poles of equal heights are standing opposite each other on either side of the road. From a point between them on the road, the angle of elevation to the top of the pole on one side is 45° and the angle of depression to the top of the pole on the other side is 30°. The width of the road is 80m. Find the height of the poles.

Two hoardings are put on two poles of equal heights standing on either side of the road. From a point between them on the road, the angle of elevation to the top of the pole on one side is 45° and the angle of depression to the top of the pole on the other side is 30°. The width of the road is 80m. Find the height of the poles.

Two hoardings are put on **two poles of equal heights**, standing on either side of the road. From a point between them on the road, the angle of elevation to the top of the pole on one side is 45° and the angle of depression to the top of the pole on the other side is 30°. The width of the road is 80m. Find the height of the poles.

Class 10 || Chapter 9.1 Some Applications of Trigonometry || Question no. 10 - Class 10 || Chapter 9.1 Some Applications of Trigonometry || Question no. 10 14 minutes, 8 seconds - Two poles of equal heights, are standing opposite each other on either side of the road which is 80m wide. From a point between them on the road, the angle of elevation to the top of the pole on one side is 45° and the angle of depression to the top of the pole on the other side is 30°. The width of the road is 80m. Find the height of the poles.

Q10-Two poles of equal heights are standing opposite on either side of the road which is 80 m wide - Q10-Two poles of equal heights are standing opposite on either side of the road which is 80 m wide 5 minutes, 2 seconds - Exercise9.1-Ncert-Applications of Trigonometry-Class10 In this video we will learn the solutions of the given below problems 10. Two poles of equal heights are standing opposite to each other on either side of road 120 feet wide. - Two poles of equal heights are standing opposite to each other on either side of road 120 feet wide. 5 minutes, 15 seconds - 10th class mathematics. Mathematics, ncert, SSC, telangana board mathematics, andhra board mathematics, state syllabus, real ...
