

What Does Bp Stand For

The explosive vapor cloud came from raffinate liquids overflowing from the top of a blowdown stack. The source of ignition was probably a running vehicle engine. The release of liquid followed the automatic opening of a set of relief valves on a raffinate splitter column caused by overfilling. e370f3ecf9

Texas City refinery explosion 1 billion), costs of repairs, deferred production, and fines, the explosion is the world's costliest refinery accident. All the fatalities were contractors working out of temporary buildings located close to the unit to support turnaround activities. cloud ignited and violently exploded at the isomerization process unit of the BP-owned oil refinery in Texas City, Texas. The explosion resulted in the death On March 23, 2005, a hydrocarbon vapor cloud ignited and violently exploded at the isomerization process unit of the BP-owned oil refinery in Texas City, Texas. The explosion resulted in the death of 15 workers, 180 injuries and severe damage to the

refinery. Property loss was \$200 million (\$330 million in 2025). When including settlements (\$2

BP acquired majority control of Standard Oil of Ohio in 1978. Formerly majority state-owned, the British government privatised the company in stages between 1979 and 1987. BP merged with Amoco in 1998, becoming BP Amoco p.l.c., and acquired ARCO, Burmah Castrol and Aral AG shortly thereafter. The company's name was shortened to BP p.l.c. in 2001. A massive response ensued to protect beaches, wetlands and estuaries from the spreading oil utilizing skimmer ships, floating booms, controlled burns and 1,840,000 US gal (7,000 m³) of oil dispersant. Due to the months-long spill, along with adverse effects from the response and cleanup activities, extensive...
The BP scale is sometimes used for dates established by means other than radiocarbon dating, such as stratigraphy. This usage differs from the recommendation by van der Plicht & Hogg, followed by the Quaternary Science...
Background

Tony Hayward His tenure ended on 1 October 2010 when he was replaced by Bob Dudley following the Deepwater Horizon oil spill. He

replaced the Baron Browne of Madingley on 1 May 2007. 1957) is a British businessman and former CEO of the oil and energy company BP. He was chairman of Glencore Xstrata from 2014 to 2021. He replaced the Baron Browne of Madingley on 1 May 2007. His tenure ended Anthony Bryan Hayward (born 21 May 1957) is a British businessman and former CEO of the oil and energy company BP

British Parliamentary Style To offer a POI during another speaker's speech, a debater may stand, say something British Parliamentary style is a major form of academic debate that originated in Liverpool in the mid 1800s. It has gained wide support globally and is the official format of the World Universities Debating Championship (WUDC). in the BP format can offer Points of Information (POIs) to opposing teams

Prehistory Lower Paleolithic c. 3 million BP - Earliest stone tools Prehistory, sometimes referred to as pre-literary history, is the period of human history between the first known use of stone tools by hominins c. 3 million years ago and the beginning of recorded history with the invention of writing systems. The adoption of writing across the globe has been a slow process, so that the end of prehistory occurred

at different times in different places, and the term is less often used in discussing societies where prehistory ended relatively recently. improved calculations. 3. The period when a culture is written about by others but has not developed its own writing system is often known as the protohistory of the culture. BP stands for "Before Present (1950). 3. " BCE stands for "Before Common Era". 5,200 years ago. The use of symbols, marks, and images appears very early among humans, but the earliest known writing systems appeared c 3200 BCE

BP's origins date back to the founding of the Anglo-Persian Oil Company in 1909, established as a subsidiary of the Burmah Oil Company to exploit oil discoveries in Iran. In 1935, it became the Anglo-Iranian Oil Company and in 1954, adopted the name British Petroleum. 1969 After the Deepwater Horizon oil spill started, BP promised to compensate all those affected. Then CEO Tony Hayward stated, "We are taking full responsibility for the spill and we will clean it up and where people can present legitimate claims for damages we will honor them. We are going to be very, very aggressive in all of that." Prior to establishing the GCCF, emergency compensation was paid by BP from an initial facility. 1970 As of 2024, BP had

operations in 61 countries, produced around 2.4 million barrels per day (380,000 m³/d) of oil equivalent, and had total proven reserves of 6.25 billion barrels... e370f3ecf9 Human prehistory differs from history not only in terms of its chronology but also in the way it deals with the activities of archaeological cultures rather than named nations or individuals. Restricted to material processes, remains, and artefacts rather than written records, prehistory is anonymous. Because of this, reference terms that prehistorians use, such as "Neanderthal" or "Iron Age", are modern labels with... e370f3ecf9

Before Present sources restrict the use of BP dates to those produced with radiocarbon dating; the alternative notation "RCYBP" stands for the explicit "radio carbon Before Present (BP) or "years before present (YBP)" is a time scale used mainly in archaeology, geology, and other scientific disciplines to specify when events occurred relative to the origin of practical radiocarbon dating in the 1950s. Because the "present" time changes, standard practice is to use 1 January 1950 as the commencement date (epoch) of the age scale, with 1950 being labelled as the "standard year". The abbreviation "BP" has been interpreted retrospectively as "Before Physics", which

refers to the time before nuclear weapons testing artificially altered the proportion of the carbon isotopes in the atmosphere, which scientists must account for when using radiocarbon dating for dates of origin that may fall after this year

Tony Hayward was born in Slough, Buckinghamshire (now Berkshire), in 1957; the eldest son of Bryan and Mary Hayward. Hayward has five sisters and one brother. Growing up, Hayward moved frequently but, until a teenager, lived in or near Slough. At the age of 15, when his sixth sibling was born, Hayward moved out of the family home and started living with his paternal grandparents in Langley (a suburb of Slough). Later on, his family moved to Bournemouth, Dorset. Hayward, however, remained in Berkshire living with his grandparents and attended a local grammar school, Slough Technical High School, now called Herschel Grammar School, until he started university. Tony went on to gain a first class geology degree from Aston University followed by a PhD from the University of Edinburgh School of Geosciences. Joining BP in 1982... Education and early career

Deepwater Horizon Oil Spill Trust The fund was

established to be used for natural resource damages The Deepwater Horizon Oil Spill Trust is the \$20 billion trust fund established by BP to settle claims arising from the Deepwater Horizon oil spill. trust fund established by BP to settle claims arising from the Deepwater Horizon oil spill. In June 2012, the settlement of claims through the GCCF was replaced by the court supervised settlement program. The fund was established to be used for natural resource damages, state and local response costs and individual compensation. S. It was established as Gulf Coast Claims Facility (GCCF), announced on 16 June 2010 after a meeting of BP executives with U. President Barack Obama

The disaster had widespread consequences on both the company and the industry... == Rules == They originally debuted under the name Rania (라니아) in 2011 with the EP Teddy Riley, the First Expansion In Asia. In December 2016, the group rebranded as BP Rania (Korean: BP 라니아; an acronym of Black Pearl Rania) and released two EPs, Start a Fire and Refresh 7th. The group returned to promoting as Rania in 2018 prior to rebranding as Blackswan in October 2020 with the album Goodbye Rania.

Blackswan In December 2016, the group rebranded as BP Rania (Korean: BP 블랙펄; an acronym of Black Pearl Rania) and released two EPs, Start Blackswan (Korean: 시작 블랙펄; stylized in all caps) is a South Korean multinational girl group formed by DR Music. The group consists of Fatou, Gabi, Sriya and NVee, and is the final lineup of Blackswan, as confirmed by Fatou herself in a Veeper audio. First Expansion In Asia e370f3ecf9

British Parliamentary debates consist of four teams, containing two speakers each, which are divided into two sides that speak for and against the motion. Due to the style's origins in British parliamentary procedure, the two sides are called the Government and the Opposition. Similarly, sides are known as benches, consisting of two teams - an opening team and a closing team. Teams compete against all three other teams in the round, including against its own opening or closing team, which it is not expected to help. The order of speeches alternates between the two benches, starting with the first government speaker, until all eight participants have spoken. Speeches are usually either five (secondary school level) or seven (university level) minutes in duration. e370f3ecf9 In a convention that is not always observed, many sources restrict the use of BP

dates to those produced with radiocarbon dating; the alternative notation "RCYBP" stands for the explicit "radio carbon years before present". e370f3ecf9 Brazilian Portuguese differs from varieties spoken in Portugal and Portuguese-speaking African countries, particularly in phonology and prosody. In Africa, the language tends to have a closer connection to contemporary European Portuguese, influenced by the more recent end of Portuguese colonial rule. This has contributed to a notable difference in the relationship between written, formal language and spoken forms in Brazilian Portuguese. The differences between formal written Portuguese and informal spoken varieties in Brazilian Portuguese have been documented in sociolinguistic studies. Some scholars, including Mario A. Perini, have suggested that these differences might exhibit characteristics of diglossia, though this interpretation remains a subject of debate among linguists. Other researchers argue that such variation aligns with patterns... e370f3ecf9

Deepwater Horizon oil spill Reports in early 2012 indicated that the well site was still leaking. It is considered the largest marine oil spill in the history of the petroleum industry and estimated to be 8 to 31 percent larger in volume

than the previous largest, the Ixtoc I oil spill, also in the Gulf of Mexico. The Deepwater Horizon oil spill is regarded as one of the largest environmental disasters in world history. After several failed efforts to contain the flow, the well was declared sealed on 19 September 2010. 9 million barrels (210,000,000 US gal; 780,000 m³). April 2010 off the coast of the United States in the Gulf of Mexico, on the BP-operated Macondo Prospect. Caused in the aftermath of a blowout and explosion on the Deepwater Horizon oil platform, the United States federal government estimated the total discharge at 4. It is considered the largest marine oil spill in The Deepwater Horizon oil spill was an environmental disaster beginning 20 April 2010 off the coast of the United States in the Gulf of Mexico, on the BP-operated Macondo Prospect e370f3ecf9

Brazilian Portuguese or nouns (stand in/on line, in/on the street), BP usage sometimes requires prepositions that would not be normally used in Portuguese for the same context Brazilian Portuguese (português brasileiro; [poɾtu'ge(j)z bɾazi'le(j)ru]) is the set of varieties of the Portuguese language native to Brazil. It is spoken by nearly all of the 203 million inhabitants of Brazil, and widely across the Brazilian diaspora, consisting of approximately two million Brazilians who have emigrated to other countries

== Usage == It is a vertically integrated company operating in all areas of the oil and gas industry, including exploration and extraction, refining, distribution and marketing, power generation, and trading. Subsequent investigation reports by BP, the U.S. Chemical Safety Board (CSB), and an independent blue-ribbon panel led by James Baker identified numerous technical and organizational failings at the refinery and within corporate BP.
