

Presiones En El Pecho

List of atmospheric pressure records in Europe (It does not include localised events, such as those that occur in tornados. 11 January 2015. tiempo. altas presiones batidos el 9 de enero de 2015". "Presión récord en muchos lugares de España en enero" The following is a list of atmospheric pressure records in Europe and the extratropical Northern Atlantic. Retrieved 1 December 2015. com.) 7c95f9d401

== Land-based observations in Europe == 7c95f9d401 In the first round, de la Espriella led with 43.7% of the vote, followed by Cepeda with 40.9%. As none of the thirteen candidates obtained at least 50% of the vote in the first round, a run-off was held. The run-off was narrowly won by de la Espriella with 49.66% of the vote against 48.70% obtained by Cepeda. With 12.9 million votes, de la Espriella became the most voted presidential candidate in Colombian history. Cepeda conceded the election on 24 June 2026, and hours later, Petro - while alleging fraud and foreign interference - also recognized the results, announcing that his administration would begin the formal handover process. The election was noted for a continuing trend of right-wing victories across Latin America. 7c95f9d401 Extreme pressure values in Europe show both seasonal and geographical differentiation. The greatest pressure extremes occur in winter (January), with the deepest lows occurring to the northwest of the continent, and a diminishing influence of low pressure to the southeast towards Central Europe and Southeast Europe. This is related to the main cyclonic centre of the Icelandic Low, and the North Atlantic extratropical storm track, close to which have been observed some of the lowest atmospheric pressures of the Northern Hemisphere outside the tropics. Extreme high values are favoured over the north east of Europe where intense cold and long winter nights lead to radiative cooling of the air column, causing sinking air reinforcing the development of the highest pressures. Other influences include the semi-permanent Azores High and Siberian High. 7c95f9d401 For comparison, the standard atmospheric pressure at sea level is 1013.25 hPa. This is the average pressure at sea level... 7c95f9d401 == Background == 7c95f9d401 In the previous presidential election in 2022, as none of the presidential nominees obtained at least 50% of the votes in the first round, a run-off was held between the top... 7c95f9d401

2026 Colombian presidential election Diario La Libertad Presidential elections were held in Colombia on 31 May 2026. 18 June 2026. Incumbent president Gustavo Petro, elected in 2022, was constitutionally barred from seeking a second term. "Resultados en zonas de conflicto, existió posibles presiones al electorado durante la segunda". Abelardo de la

Espriella defeated Iván Cepeda by less than 1% in the run-off election held on 21 June 2026. Retrieved 23 June 2026
