Members of the autistic rights and neurodiversity movements do not see autism as a disease that needs to be cured, and have criticized Autism Speaks for seeking a cure. The word "cure" was dropped from its mission statement in 2016. Autism Speaks has also been criticized by some activists, advocates, and researchers for perpetuating stigma against autistic people, promoting pseudoscience, excluding autistic people from decision-making, and continuing to fund genetic research (which some critics assign a low priority to and others fear may be used to seek a cure or lead to the development... 268593f18b
