Feminist art movement Headless Woman (Belly Dance). It also seeks to bring more visibility to women within art history and art practice. Women artists have overturned the traditional view by, for example, using unconventional materials in soft sculptures, new techniques such as stuffing, hanging and draping, and for new purposes such as telling stories of their own life experiences. The movement challenges the traditional hierarchy of arts over crafts, which views hard sculpture and painting as superior to the narrowly perceived 'women's work' of arts and crafts such as weaving, sewing, quilting and ceramics. It focuses on a woman's stomach on which text has been inscribed. And the woman keeps writing the text on the belly (body art) The feminist art movement refers to the efforts and accomplishments of feminists internationally to produce art that reflects women's lives and experiences, as well as to change the foundation for the production and perception of contemporary art 413e8613a3

As an agricultural product, milk is collected from farm animals, mostly cattle, on a dairy. It is used by humans as a drink and as the base ingredient for dairy products. The US CDC recommends that children over the age of 12 months (the minimum age to stop giving breast milk or formula) should have two servings of milk products a day, and more than six billion people worldwide consume milk and milk products. The ability for adult humans to digest milk relies on lactase persistence, so lactose intolerant individuals have trouble digesting lactose. 413e8613a3
