Neonatal sepsis Criteria with regard to hemodynamic compromise or respiratory failure are not
useful clinically because these symptoms often do not arise in neonates until death is imminent
and unpreventable. EOS refers to sepsis presenting in the first 7 days of life (although some
refer to EOS as within the first 72 hours of life), with LOS referring to presentation of sepsis after
7 days (or 72 hours, depending on the system used). between risk-factor guidance for neonatal
early-onset sepsis and Kaiser Permanente sepsis risk calculator in a Greek cohort". Older
textbooks may refer to neonatal sepsis as "sepsis neonatorum". 155 Neonatal sepsis is a type of
neonatal infection and specifically refers to the presence in a newborn baby of a bacterial blood
stream infection (BSI) (such as meningitis, pneumonia, pyelonephritis, or gastroenteritis) in the
setting of fever. Early Human Development. Neonatal sepsis is divided into two categories:
early-onset sepsis (EOS) and late-onset sepsis (LOS). Neonatal sepsis is the single most common
cause of neonatal death in hospital as well as community in developing country 9835a48ce6
