The book opens with a discussion of a woman in her thirties who suffered daily stomach cramps and serious weight loss, and who visited some 30 doctors over a period of 15 years. Several misdiagnoses were made before she was finally found to have celiac disease. Groopman explains that no one can expect a physician to be infallible, as medicine is an uncertain science, and every doctor sometimes makes mistakes in diagnosis and treatment. But the frequency and seriousness of those mistakes can be reduced by "understanding how a doctor thinks and how he or she can think better". 42e0379d25

Privacy concerns with Facebook In response to these growing privacy concerns, some pressure groups and government agencies have increasingly asserted the users' right to privacy and to be able to control their personal data. Meta has also been a part of many data breaches that have occurred within the company. These stem partly from the company's revenue model that involves selling information collected about its users for many things including advertisement targeting. As a result, individuals' identities and private information have sometimes been compromised without their permission. These issues and others are further described including user data concerns, vulnerabilities in the company's platform, investigations by pressure groups and government agencies, and even issues with students. In addition, employers and other organizations/individuals have been known to use Meta for their own purposes.
