

Coricidin Hbp Cold And Flu

Coricidin is used to alleviate common cold symptoms such as coughs and congestion. Other versions of Coricidin are used to reduce fever or as an expectorant, while Coricidin HBP includes chlorpheniramine for people with high blood pressure. Side effects can include diarrhea and hallucination. 6cb0456c50 == Medicinal use == 6cb0456c50

Cold medicine The term encompasses a broad array of drugs, including analgesics, antihistamines and decongestants, among many others. Coricidin, Coricidin D, or Coricidin HBP, is the brand name of a combination of dextromethorphan and chlorpheniramine maleate. Cold medicines are a group of medications taken individually or in combination as a treatment for the symptoms of the common cold and similar conditions of the upper respiratory tract. It is to prescription only. It also includes drugs which are marketed as cough suppressants or antitussives, but their effectiveness in reducing cough symptoms is unclear or minimal. 6cb0456c50

While they have been used by 10% of American children in any given week, they are not recommended in Canada or the United States in children six years or younger because of lack of evidence showing effect and concerns of harm. 6cb0456c50 == Types == 6cb0456c50

Coricidin Introduced by Schering-Plough in 1949 as one of the first antihistamines, it is now owned by Bayer. Coricidin, Coricidin D (decongestant), or Coricidin HBP (for high blood pressure), is an over-the-counter cough and cold combination drug containing Coricidin, Coricidin 'D' (decongestant), or Coricidin HBP (for high blood pressure), is an over-the-counter cough and cold combination drug containing dextromethorphan (a cough suppressant) and chlorpheniramine maleate (a first-generation antihistamine). Varieties of Coricidin may also contain acetaminophen (an analgesic/antipyretic) and guaifenesin (an expectorant). 6cb0456c50
