Japan levies a tax based on engine displacement, and Japanese auto manufacturers have correspondingly focused their research and development efforts on improving the performance of their smaller engine designs. One method for increasing performance into a static displacement includes forced induction, as with models such as the Toyota Supra and Nissan 300ZX, which used turbocharger applications, and the Toyota MR2, which used a supercharger for some model years. Another approach is the rotary engine used in the Mazda RX-7 and RX-8. A third option is to change the cam timing profile... 15048d97c1 == Types of exercise == 15048d97c1
