

Promethazine With Codeine Syrup

In 2011, Wockhardt sold its nutrition business to Danone for \$356 million. 295b282e58

Thebacon Other salts used in research and other settings include thebacon's phosphate, hydrobromide, citrate, hydroiodide, and sulfate. Thebacon is marketed as its hydrochloride salt under the trade name Acedicon, and as its bitartrate under Diacodin and other trade names. used as second-line codeine replacements. The other dihydromorphinone used as an antitussive is hydromorphone (Dilaudid cough syrup); the other narcotic Thebacon (INN; pronounced), or dihydrocodeinone enol acetate, is a semisynthetic opioid that is similar to hydrocodone and is most commonly synthesised from thebaine. Thebacon was invented in Germany in 1924, four years after the first synthesis of hydrocodone. Thebacon is a derivative of acetyldihydrocodeine, where only the 6-7 double bond is saturated. 846. The hydrochloride salt has a free base conversion ratio of 0 295b282e58

Promethazine With Codeine Syrup

== History == 295b282e58

Lean (drug) Users of lean are at risk Lean or purple drank (known by numerous local and street names) is a polysubstance drink used as a recreational drug. especially within the Southern United States. It is prepared by mixing prescription-grade cough or cold syrup containing an opioid drug and an antihistamine drug with a soft drink and sometimes hard candy. Codeine/promethazine syrup is usually used to make lean, but other syrups are also used. Codeine/promethazine syrup is usually used to make lean, but other syrups are also used. The beverage originated in Houston as early as the 1960s and is popular in hip hop culture, especially within the Southern United States 295b282e58

Actavis) is a global pharmaceutical company focused on acquiring, developing, manufacturing, and marketing branded pharmaceuticals, generic and over-the-counter medicines, and biologic products. Due to their production of “Promethazine With Codeine Cough Syrup”, the main ingredient in the recreational drug nicknamed Actavis Generics (formerly known as Watson Pharmaceuticals and Actavis plc, prior to the acquisition of Irish-based Allergan, Inc. competition into the market. Actavis operates in approximately 100 countries and has global headquarters in Dublin, Ireland and administrative headquarters

== References == 295b282e58 Commonly available as tablets, solutions, elixirs, and other oral forms, dihydrocodeine is also available in some countries as an injectable solution for deep subcutaneous and intra-muscular administration. As with codeine, intravenous administration should be avoided, as it could result in anaphylaxis and life-threatening pulmonary edema. In the past, dihydrocodeine suppositories were used. Dihydrocodeine is available in suppository form on prescription. Dihydrocodeine is used as an alternative to codeine and similarly belongs to step 2 of the WHO analgesic ladder. 295b282e58 Actavis also operates the world's third-largest generics business. The company has been ranked in the top 3 in 12 global markets, the top 5 in 16 global markets, and in the top 10 in 33 global markets. Actavis... 295b282e58 It was first described in 1911 and approved for medical use in 1948. Dihydrocodeine was developed during the search for more effective cough medication, especially to help reduce the spread of tuberculosis, pertussis, and pneumonia in the years from c.a. 1895 to 1915. It is similar in chemical structure to codeine... 295b282e58 Common

Promethazine With Codeine Syrup

side effects of promethazine include confusion and sleepiness; consumption of alcohol or other sedatives can make these symptoms worse. It is unclear if use of promethazine during pregnancy or breastfeeding is safe. Use of promethazine is not recommended in those less than two years old, due to potentially negative effects on breathing. Use of promethazine by injection into a vein is not recommended, due to potential skin damage. Promethazine is in the phenothiazine family of medications. It is also a strong anticholinergic and at high or toxic doses can act as a deliriant. 295b282e58 The Schedules are referred to under State and Territory legislation for regulatory purposes. Although each State and Territory has its own laws, the vast majority of medicines and poisons are classified according to the SUSMP to achieve uniform national regulation. 295b282e58 Wockhardt is the first company outside the US and Europe to manufacture recombinant human insulin. 295b282e58 == Medical uses == 295b282e58 Users of lean are at risk of addiction, and serious complications include respiratory depression, respiratory arrest, and cardiac arrest. Lean is especially dangerous when consumed with alcohol. 295b282e58

Wockhardt Schools Wockhardt is known for producing cough syrup with the sedative promethazine and the opiate codeine, used in the recreational street drug lean, which Wockhardt is an Indian pharmaceutical and biotechnology company headquartered in

Promethazine With Codeine Syrup

Mumbai, India. The company has manufacturing plants in India, the UK, Ireland, France and US, and subsidiaries in US, UK, Ireland and France. It produces formulations, biopharmaceuticals, nutrition products, vaccines and active pharmaceutical ingredients (APIs) 295b282e58

Actavis markets brand products through six franchises in key therapeutic categories including: Aesthetics/Dermatology/Plastic Surgery; Neurosciences/CNS; Eye Care; Women's Health and Urology; GI and Cystic Fibrosis; and Cardiovascular Disease and Infectious Disease. The company's products include Botox, Namenda, Restasis, Linzess, Bystolic, Juvederm, Latisse, Lo Loestrin Fe, Estrace, Teflaro, Dalvance, Ozurdex, Optive, Natrelle, Viibryd, Liletta, Saphris, Enablex, Actonel, Androderm, Gelnique and others. 295b282e58 == Schedules == 295b282e58 The term lean refers to the tendency for users to have difficulty standing up straight and walking while under the influence of the drug. "Purple drank" references the mixture's typically purple hue, as the cough syrups employed are often purple in color, and the African-American Vernacular English term "drank" for an alcoholic beverage. Other names include "syrup/sizzurp", "surp/zurp", "jelly", "Tussin/Tuss", "Barre", "Wock", "Act", "Texas tea", "mud", "dirty Sprite", and "tsikuni"... 295b282e58

Promethazine With Codeine Syrup

Dihydrocodeine antihistamine promethazine (Phenergan) may also have a positive effect on hepatic metabolism of dihydrocodeine as it does with codeine. It was developed in Germany in 1908 and first marketed in 1911. Higher doses of Dihydrocodeine, sold under the brand name Dicodin among others, is a semi-synthetic opioid analgesic prescribed for pain or severe dyspnea, or as an antitussive, either alone or compounded with paracetamol (acetaminophen) (as in co-dydramol) or aspirin 295b282e58

Codeine It is generally taken orally. Evidence does not support its use for acute cough suppression in children. Its effects last for about four to six hours. Brand named as Phenergan with Codeine or in generic form as promethazine with Codeine Codeine is an opiate and prodrug of morphine mainly used to treat pain, coughing, and diarrhea. Greater benefit may occur when combined with paracetamol (acetaminophen) as codeine/paracetamol or a nonsteroidal anti-inflammatory drug (NSAID) such as aspirin or ibuprofen. Codeine exhibits abuse potential similar to other opioid medications, including a risk of addiction and overdose. It is commonly used as a recreational drug. It is found naturally in the sap of the opium poppy, *Papaver somniferum*. In Europe, it is not recommended as a cough medicine for those under 12 years of age. conjunction with the anti-nausea medication promethazine in the form of a syrup. It is typically used to treat mild to moderate degrees of pain. It usually starts working

Promethazine With Codeine Syrup

after half an hour, with maximum effect at two hours 295b282e58

Standard for the Uniform Scheduling of Medicines and Poisons Before 2010, it was known as the Standard for the Uniform Scheduling of Drugs and Poisons (SUSDP). In Western Australia The Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP), also known as the Poisons Standard for short, is an Australian legislative instrument produced by the Therapeutic Goods Administration (TGA). doxylamine (in preparations also containing codeine), promethazine (in preparations also containing codeine), and pseudoephedrine. The SUSMP classifies drugs and poisons into different Schedules signifying the degree of control recommended to be exercised over their availability to the public 295b282e58

Common side effects include nausea, vomiting, constipation, itchiness, lightheadedness, and drowsiness. Serious side effects may include breathing difficulties and addiction. Whether it can be used safely during pregnancy is unclear. Care should be used during breastfeeding, as it may result in opiate toxicity in the... 295b282e58

Promethazine an effect that has led to some recreational use (especially with codeine). Promethazine is taken by mouth (oral), as a rectal suppository, or by injection Promethazine,

Promethazine With Codeine Syrup

sold under the brand name Phenergan among others, is a first-generation antihistamine, sedative, and antiemetic used to treat allergies, nausea, and vomiting. It may also help with some symptoms associated with the common cold and may also be used for sedating people who are agitated or anxious, an effect that has led to some recreational use (especially with codeine). Promethazine is taken by mouth (oral), as a rectal suppository, or by injection into a muscle (IM) 295b282e58

== History == 295b282e58 Wockhardt was founded by Dr. Habil Khorakiwala in the 1960s. His father Fakhruddin T. Khorakiwala had acquired Worli Chemical Works in 1959. This was incorporated as Wockhardt Pvt. Ltd., in 1973. Wockhardt Ltd. was incorporated on 8 July 1999. In the 1990s, Wockhardt gained market share with its painkiller Proxyvon (opioid tramadol + paracetamol) and blood pressure drugs (lisinopril, etc.). In 1995, it expanded into biotechnology, and subsequently started producing intravenous fluids. In 1999, Wockhardt joined the Indian Pharmaceutical Alliance as a founding member in an effort to promote the development of generic drugs in India. 295b282e58

Dioxethedrin It is an ephedrine derivative (and hence Dioxethedrin (INNTooltip International Nonproprietary Name), or dioxethedrine, also known as 3,4-dihydroxy-N-ethylnorephedrine, is

Promethazine With Codeine Syrup

a sympathomimetic medication. It was a component of the antitussive syrup Bexol (a combination of dioxethedrin, codeine, and promethazine). It was a component of the antitussive syrup Bexol (a combination of dioxethedrin, codeine, and promethazine). Analogues of dioxethedrin include dioxifedrine (α -methylepinephrine; 3,4-dihydroxyephedrine), corbadrine (levonordefrin; α -methylnorepinephrine), and α -methyldopamine. It is an ephedrine derivative (and hence is a phenethylamine and amphetamine) and is described as a bronchodilator and β -adrenergic receptor agonist 295b282e58
