

Can Nausea Be Caused By Constipation

Cancer and nausea This may be as a result of the cancer itself, or as an effect of the treatment such as chemotherapy, radiation therapy, or other medication such as opiates used for pain relief. Nausea and vomiting may be experienced as the most unpleasant side effects of cytotoxic drugs and may result in patients delaying or refusing further radiotherapy or chemotherapy. Cancer and nausea are associated, with about fifty percent of people affected by cancer experiencing nausea. Nausea and vomiting may also occur in people not receiving treatment, often as a result of the disease involving the gastrointestinal tract, electrolyte imbalance, or as a result of anxiety. This may be as a result of the cancer itself Cancer and nausea are associated, with about fifty percent of people affected by cancer experiencing nausea. About 70–80% of people undergoing chemotherapy experience nausea or vomiting 95d26b422d

Abdominal angina loss, diarrhea, nausea, vomiting, and an aversion or fear of eating caused by the pain associated with eating. Symptoms include abdominal pain, weight loss, diarrhea, nausea, vomiting, and an aversion or fear of eating caused by the pain associated with eating. Abdominal angina is caused by obstruction or Abdominal angina is abdominal pain after eating caused by a reduction of blood flow to the celiac trunk, superior mesenteric arteries (SMA), inferior mesenteric artery (IMA), or the surrounding organs 95d26b422d

The strategies of management or therapy of nausea and vomiting depend on the underlying causes. Medical treatments or conditions associated with a high risk of nausea and/or vomiting include chemotherapy, radiotherapy, and malignant bowel obstruction. Anticipatory nausea and vomiting may also occur. Nausea and vomiting may lead to further medical conditions and complications including: dehydration, electrolyte imbalance, malnutrition, and a decrease in quality... 95d26b422d Ondansetron (Zofran) is administered in an oral tablet form, orally dissolving tablet form, orally dissolving film, sublingual, or in an IV/IM injection. 95d26b422d The condition frequently causes digestive symptoms, epigastric pain, constipation, gastric reflux, nausea, decreased appetite, gastroparesis (delayed gastric emptying), and in severe cases Median arcuate ligament syndrome. It is much more prominent in women than men, and is diagnosed with x-ray using barium contrast. Gastroparesis is mainly caused by the relaxation of surrounding ligaments and mesenteries as a result of the weight of the stomach and may be due to genetic connective tissue disease. 95d26b422d Granisetron (Kytril, Sancuso) can be administered in tablet (Kytril), oral solution (Kytril), injection (Kytril), or in a single transdermal patch to the upper arm (SANCUSO). 95d26b422d Many of the early signs of pregnancy will be similar to symptoms that come right before a period, and it can be hard to tell the difference. 95d26b422d Visceroptosis 95d26b422d == Types == 95d26b422d Gastrointestinal infections (37%) and food poisoning are the two... 95d26b422d Children have different bowel movement patterns than adults. In addition, there is a wide spectrum of normalcy when considering children's bowel habits. On average, infants have 3-4 bowel movements/day, and toddlers have 2-3 bowel movements per day. At around age 4, children develop an adult-like pattern of bowel movements (1-2 stools/day). The median onset of functional constipation in children is at 2.3 years old, with girls and boys being similarly affected. Children benefit from scheduled toilet breaks, once early in the morning and 30 minutes after meals. The Rome III Criteria for constipation in children can help to define and diagnose constipation for various age groups. Constipation in children may present as encopresis, or the inappropriate passage of stool (usually involuntarily) in inappropriate places. Stool can build up in the rectum, leading to rectal dilation and decreased gastric emptying. This can present as nausea, vomiting, abdominal distention, loss of appetite and pain. Children may also have stool retentive behaviors... 95d26b422d

Stercoral ulcer e. Prolonged constipation leads to production of fecaliths, leading to possible progression into a fecaloma. Treatment modalities can include both surgical and non-surgical techniques. These hard lumps irritate the rectum and lead to the formation of these ulcers. colon due to pressure and irritation resulting from severe, prolonged constipation due to a large bowel obstruction, damage to the autonomic nervous system Stercoral ulcer is an ulcer of the colon due to pressure and irritation resulting from severe, prolonged constipation due to a large bowel obstruction, damage to the autonomic nervous system, or stercoral colitis. These ulcers may be seen on imaging, such as a CT scan but are more commonly identified using endoscopy, usually a colonoscopy. It results in fresh bleeding per rectum (i. hematochezia). It is most commonly located in the sigmoid colon and rectum 95d26b422d

Over 30 definitions of nausea were proposed in a 2011 book on the topic. 95d26b422d Abdominal angina is diagnosed using imaging to identify stenosis. Differential diagnoses include GERD, dietary sensitivities, constipation, pancreatitis, abdominal abscess, appendicitis, irritable bowel syndrome, gastroenteritis, hepatitis, and gastrointestinal system inflammation. Chronic mesenteric ischemia requires surgical revascularization and treatment like stents, transaortic endarterectomy, or bypassing the... 95d26b422d == Signs & symptoms == 95d26b422d Dolasetron (Anzemet) can be administered in tablet form or in an injection. 95d26b422d

Nausea as motion sickness and vertigo can lead to nausea and vomiting. It can be a debilitating symptom if prolonged and has been described as placing discomfort on the chest, abdomen, or back of the throat. Nausea may be caused by depression, anxiety disorders and Nausea is a diffuse sensation of unease and discomfort, sometimes perceived as an urge to vomit. Dysmenorrhea can cause nausea 95d26b422d

== Presentation == 95d26b422d Tropisetron... 95d26b422d Nausea is a non-specific symptom, which means that it has many possible causes. Some common causes of nausea are

gastroenteritis and other gastrointestinal disorders, food poisoning, motion sickness, dizziness, migraine, fainting, low blood sugar, anxiety, hyperthermia, dehydration and lack of sleep. Nausea is a side effect of many medications including chemotherapy, or morning sickness in early pregnancy. Nausea may also be caused by disgust and depression. 95d26b422d Medications taken to prevent and treat nausea and vomiting are called antiemetics. The most commonly prescribed antiemetics in the US are promethazine, metoclopramide, and the newer ondansetron. The word nausea is from Latin nausea, from Greek ναυσία – nausea, "ναυτία" – nautia, seasickness, "feeling sick or queasy", from Latin naus, Greek νᾱος, a ship. 95d26b422d == See also == 95d26b422d

Volvulus Symptoms include abdominal pain, abdominal bloating, vomiting, constipation, and bloody stool. In this situation there may be fever or significant pain when the abdomen is touched. Onset of symptoms may be rapid or more gradual. The mesentery may become A volvulus is a bowel obstruction resulting from a loop of intestine twisting around itself and its supporting mesentery. abdominal pain, abdominal bloating, vomiting, constipation, and bloody stool. Onset of symptoms may be rapid or more gradual. The mesentery may become so tightly twisted that blood flow to part of the intestine is cut off, resulting in ischemic bowel 95d26b422d

Constipation has many causes. Common causes include slow movement of stool within the colon, irritable bowel syndrome, and pelvic floor disorders. Underlying associated diseases include hypothyroidism, diabetes, Parkinson's disease, celiac disease, non-celiac gluten sensitivity, vitamin B12 deficiency, colon cancer, diverticulitis, and inflammatory bowel disease. Medications associated with constipation include opioids, certain antacids, calcium channel blockers, and anticholinergics. Of those taking opioids about 90% develop constipation. Constipation is more concerning when there is weight loss or anemia, blood is present in the stool, there is a... 95d26b422d Abdominal angina is caused by obstruction or stenosis of the inferior mesenteric artery, celiac trunk, or superior mesenteric artery. Gender, age, smoking, hypertension, diabetes, and hyperlipidemia are risk factors for abdominal angina. The digestive tract relies on the celiac, superior mesenteric, and inferior mesenteric arteries for blood flow. Abdominal pain occurs when these arteries fail to provide adequate blood flow. 95d26b422d Typical patients will present with a history of constipation, likely chronic constipation. Patient populations vulnerable to chronic constipation include, but are not limited to, the elderly, persons with dementia, those with damage to the autonomic nervous system, infectious diseases, or intestinal vascular compromise. Some patients, due to their condition, may have limitations in reporting their symptoms. Typical symptoms can include abdominal pain... 95d26b422d Initial treatment for sigmoid volvulus may occasionally occur via sigmoidoscopy or with a barium enema. Due to the high risk of recurrence, a bowel resection within the next two days is generally... 95d26b422d 5-HT3 receptor antagonists block serotonin receptors in the central nervous system and gastrointestinal tract. As such, they can be used to treat post-operative and cytotoxic drug nausea & vomiting. However, they can also cause constipation, dry mouth, and fatigue. 95d26b422d

Constipation in children It is a functional gastrointestinal disorder. Bisacodyl and glycerin suppositories can also be used. stomach pain and nausea, but PEG was more effective at treating the symptoms of constipation. After Constipation in children refers to the medical condition of constipation in children 95d26b422d

Gastroptosis The stomach is often elongated. The condition frequently causes digestive symptoms, epigastric pain, constipation, gastric reflux, nausea, decreased appetite, gastroparesis Gastroptosis is the abnormal downward dislocation (ptosis) of the stomach in which its greater curve is displaced below the iliac crest. elongated 95d26b422d

== Causes == 95d26b422d

Constipation Complications from constipation may include hemorrhoids, anal fissure or fecal impaction. The stool is often hard and dry. Babies often have three to four bowel movements per day while young children typically have two to three per day. also present with constipation. Cystocele can develop as a result of chronic constipation. The normal frequency of bowel movements in adults is between three per day and three per week. Other symptoms may include abdominal pain, bloating, and feeling as if one has not completely passed the bowel movement. Constipation can be caused or exacerbated by a low-fiber diet Constipation is a bowel dysfunction that makes bowel movements infrequent or hard to pass 95d26b422d

Antiemetic However, they can also cause constipation, dry mouth, and fatigue An antiemetic is a drug that is effective against vomiting and nausea. Antiemetics are typically used to treat motion sickness and the side effects of opioid analgesics, general anaesthetics, and chemotherapy directed against cancer. They may be used for severe cases of gastroenteritis, especially if the patient is dehydrated. tract. As such, they can be used to treat post-operative and cytotoxic drug nausea & vomiting 95d26b422d

Risk factors include a birth defect known as intestinal malrotation, an enlarged colon, Hirschsprung disease, pregnancy, and abdominal adhesions. Long term constipation and a high fiber diet may also increase the risk. The most commonly affected part of the intestines in adults is the sigmoid colon, with the cecum being the second most affected. In children the small intestine is more often involved. The stomach can also be affected. Diagnosis is typically with medical imaging such as plain X-rays, a GI series, or CT scan. 95d26b422d

Signs and symptoms of pregnancy Pregnancy symptoms may be categorized based on trimester as well as region of the body affected. Constipation during pregnancy is thought to be due to decreased smooth muscle motility in the bowel caused by normal increases in Signs and symptoms of pregnancy are common, benign conditions that result from the changes to the body that occur during pregnancy. of pregnant women. If a person is concerned about their symptoms they should be encouraged to speak with an appropriate healthcare

professional. Depending on severity, common symptoms in pregnancy can develop into complications. Each pregnancy can be quite different and many people do not experience the same or all of the symptoms. Signs and symptoms of pregnancy typically change as pregnancy progresses, although several symptoms may be present throughout 95d26b422d

== Early pregnancy == 95d26b422d Some antiemetics previously thought to cause birth defects appear safe for use by pregnant women in the treatment of morning sickness and the more serious hyperemesis gravidarum. 95d26b422d
