Dental abscess the face, only upward or downward as the nerves that serve each side of the face are separate. A failed root canal treatment may also create a similar abscess. In a periapical abscess, usually the origin is a bacterial infection that has accumulated in the soft, often dead, pulp of the tooth. This can be caused by tooth decay, broken teeth or extensive periodontal disease (or combinations of these factors). The most common type of dental abscess is a periapical abscess, and the second most common is a periodontal abscess. Severe aching and discomfort on the side of the face where A dental abscess is a localized collection of pus associated with a tooth

The main types of dental abscess are: Wainwright gave the name Brock Craggs to the section of ridge between Rest Dodd and Angletarn Pikes, although the summit carrying this name stands to the west of the watershed. A higher unnamed top, 1,870 ft (570 m), was ignored in his Pictorial Guide to the Lakeland Fells, despite standing on the ridge. This is one of the many reasons why Wainwrights differ from more systematic hill lists such as Hewitts or Nuttalls.
