Square root of 5 The square root of 5, denoted $\sqrt{5}$, is the positive real number that, when multiplied by itself, gives the natural number 5. The square root of 5, denoted 4c42168d67

Square root of 8 It is the second Lagrange number in Diophantine approximation, arises in Plato's Meno as the side length of a square having twice the area of a square of side 2, and is the ratio used in Johann Gottlob Töpfer's system of organ flue pipe scaling. It is more precisely called the principal square root of 8. The square root of 8 is the positive real number that, when multiplied by itself, gives the natural number 8. This number appears in numerous geometric and number-theoretic contexts, and in classical philosophy and musical acoustics. It is more precisely called the principal square root of 8, to distinguish it from the negative number with the same property. The square root of 8 is the positive real number that, when multiplied by itself, gives the natural number 8. 4c42168d67

1829: "In Ohio, they have a vulgar proverb which runs thus—"Root, hog, or die." It is usually spread in staring capitals among idlers and it is said often has an admirable effect in promoting habits of industry." —Vermont Gazette (March 17, 1829) 4c42168d67

Square root algorithms Square root algorithms compute the non-negative square root $\sqrt{S}$ of a positive real number S . Since all square root algorithms compute the non-negative square root 4c42168d67

== Denotation and approximations == 4c42168d67 The word "root" is used as an imperative verb, as is "die". The phrase (sometimes rendered with commas after root and hog) can be parsed as, "Root (search for roots to eat), hog, or [you will] die." 4c42168d67 S 4c42168d67 1 4c42168d67 == Characteristics == 4c42168d67

Lewis Black's Root of All Evil Sometimes there were pre-recorded video segments directed by supervising producer Michael Addis. The series Lewis Black's Root of All Evil is an American television series that premiered on March 12, 2008, on Comedy Central and was hosted by comedian Lewis Black. The series was produced by Scott Carter and written by David Sacks. Historically, the square root of 10 has been used as an approximation for the mathematical constant π , with some mathematicians erroneously arguing that the square root of 10 is itself the ratio between the diameter and circumference of a circle. The number also plays a key role in the calculation of orders of magnitude. 4c42168d67

Root system root system is a configuration of vectors in a Euclidean space satisfying certain geometrical properties. Since Lie groups (and some analogues such as algebraic groups) and Lie algebras have become important in many parts of mathematics during the twentieth century, the apparently special nature of root systems belies the number of areas in which they are applied. The concept is fundamental in the theory of In mathematics, a root system is a configuration of vectors in a Euclidean space satisfying certain geometrical properties. Further, the classification scheme for root systems, by Dynkin diagrams, occurs in parts of mathematics with no overt connection to Lie theory (such as singularity theory). Finally, root systems are important for their own sake, as in spectral graph theory. The concept is fundamental in the theory of Lie groups and Lie algebras, especially the classification and representation theory of semisimple Lie algebras 4c42168d67

Root hog or die "Root hog or die" is a common American catch-phrase dating at least to the early 1800s. Coming from the early colonial practice of turning pigs loose in the woods to fend for themselves, the term is an idiomatic expression for self-reliance. == Definitions and examples == 4c42168d67 There are two complex square roots of -1 : the imaginary unit i and its additive inverse $-i$. More generally, every nonzero complex number has two distinct complex-valued square roots, which are additive inverses of each other, while zero has only zero as its (double) square root. 4c42168d67

Imaginary unit Historically, the imaginary unit The imaginary unit, usually denoted by i , is a mathematical constant that is a solution to the quadratic equation $x^2 = -1$, which is not solved by any real number. complex-valued square roots, which are additive inverses of each other, while zero has only zero as its (double) square root. Any real-number multiple of the imaginary unit is called an imaginary number 4c42168d67

– 4c42168d67 Historically, the imaginary unit was denoted by 4c42168d67 By combining the real numbers with the imaginary unit using addition and multiplication, a new number system known as the complex numbers is formed; it consists of all numbers of the form $a + bi$ with real numbers a and b . 4c42168d67 Lewis Black's Root of All Evil is formatted as a tongue-in-cheek mock trial acted in deadpan. Black presided over two opposing guest comedians championing a person or thing as the "root of all evil" (YouTube, beer, Oprah Winfrey, PETA, etc.). The series ended on October 1, 2008, with a total of 18 episodes. The series' cancellation was confirmed by Lewis Black in September 2009. The entire first season of Lewis Black's Root of All Evil was released on DVD in the United States on September 30, 2008. The remaining episodes from season two are not currently available on DVD. 4c42168d67 The 13th-century physician Abd al-Latif al-Baghdadi was noted by biographers to have compared "uncertainty in medicine to the mathematical impossibility of determining irrational numbers such as π or the square root of ten". Specifically, in his Book of the Two Pieces of Advice (Kitāb al-Naṣīḥatayn) Abd al-Latif offered "as an example the surface of the circle or a square root such as that of ten", saying that "if someone says that the square root of ten is three, he cannot be counted as an arithmetician, and his words cannot be accepted". 4c42168d67 5 4c42168d67 2 4c42168d67 Each show followed the same format: Black welcomed the viewer to his courtroom and announced the two Evil candidates for the Root of All Evil.
