

Inside Out Throat Surgery

== Instrument list == The act of performing surgery may be called a surgical procedure or surgical operation, or simply "surgery" or "operation". In this context, the verb "operate" means to perform surgery. The adjective surgical means pertaining to surgery; e.g. surgical instruments, surgical facility or surgical nurse. Most surgical procedures are performed by a pair of operators: a surgeon who is the main operator performing the surgery, and a surgical assistant who provides in-procedure manual assistance during surgery. Modern surgical operations typically require a surgical team that typically consists of the surgeon, the surgical assistant, an anaesthetist (often also complemented by an anaesthetic nurse), a scrub nurse (who handles sterile equipment), a circulating nurse and a surgical technologist, while...

Linda Lovelace, a sexually frustrated woman, seeks advice from her friend Helen on how to achieve an orgasm. After attending a sex party that proves unhelpful, Helen suggests that Linda visit a psychiatrist named Dr. Young. During their sessions, the doctor discovers that Linda's clitoris is located in her throat, instead of its normal location. Because stimulation of the clitoris is usually required for a woman to achieve orgasm, Linda would need to develop an oral sex technique that would stimulate her unusually... Interest in the possibility of gender-affirming surgeries for transgender women has been reported since Antiquity, though the first successful surgery was performed in the 20th century. Most patients report greater quality of life and sexual health outcomes postoperatively. Roman medical practices, including surgery, were borrowed from the Greeks, with many Roman surgeons coming from Greece. In the 2nd century CE, Galen, a Greek physician advanced Roman surgical knowledge by combining Greek and Roman medical knowledge.
