The origins of autoflowering cannabis are still debatable. The strain Lowryder, by breeder The Joint Doctor, was the original large scale marketed autoflower and was first sold in 2003. Lowryder contains genetics from a Mexican strain that was referred to as Mexican Rudy and is believed to be created from a cross between a Mexican sativa and a Russian Cannabis ruderalis. Another theory is that the early genetics came from the first oilseed hemp variety called Finola, which was developed from Russian stock in Finland during 1995.
