

Difference Between Indica And Sativa Weed

Charas The plant Charas is a cannabis concentrate made from the resin of a live cannabis plant (Cannabis sativa either Indica subspecies or Sativa subspecies) and is handmade in the Indian subcontinent. The difference between charas and hashish is that hashish is made from a dead cannabis plant and charas is made from a live one. the resin of a live cannabis plant (Cannabis sativa either Indica subspecies or Sativa subspecies) and is handmade in the Indian subcontinent. The plant grows wild throughout Northern India along the stretch of the Himalayas (its putative origin) and is an important cash crop for the local people 496f58450f

== Botany == 496f58450f All forms of Cannabis (particularly in older texts), with types differentiated binomially (Winter hemp, Summer hemp, Indian hemp...); 496f58450f Weedy rice grains often have a red pericarp, so for this reason in the international literature the term "red rice" is often used. This term, however, is not all too fitting, because red pericarp is also found in some cultivated varieties, and is absent in many forms of weedy rice. 496f58450f == Historical background == 496f58450f == History == 496f58450f

Cannabis in Italy In particular, the possession of small amounts of marijuana for personal use is a civil infraction. cannabis light). The licensed cultivation of cannabis for medical and industrial purposes requires the use of certified seeds; however, there is no need for authorization to plant certified seeds with minimal levels of psychoactive compounds (a. Conversely, the unauthorized sale of cannabis-related products is illegal and punishable with imprisonment, as is the unlicensed cultivation of cannabis, although 2010s court cases have effectively established the legality of cultivating small amounts of cannabis for exclusively personal use. a. The possible sanctions for possession vary from the issuing of a diffida to first offenders, which is an injunction not to use the drug again; to the temporary suspension of certain personal documents (e. Retrieved 2 April 2023. g. k. Archived from Cannabis is legal for medical and industrial uses in Italy, although it is strictly regulated, while it is decriminalized for recreational uses. 29 October 2023. driving licenses) for repeat offenders. There is evidence that ready access to legal cannabis is associated with a number of health harms including increased need for emergency medicine, and increased incidence of cannabis use disorder and road traffic accidents. 496f58450f Varieties are developed to intensify specific characteristics of the plant, or to differentiate the strain for the purposes of marketing or

to make it more effective as a drug. Variety names are typically chosen by their growers, and often reflect properties of the plant such as taste, color, smell, or the origin of the variety. The Cannabis strains referred to in this article are primarily those varieties with recreational and medicinal use. These varieties have been cultivated to contain a high percentage of cannabinoids. Several varieties of cannabis, known as hemp, have a very low cannabinoid content, and are instead grown for their fiber and seed. Due to the legal status of the plant in many jurisdictions, Cannabis plant varieties are at high risk of biopiracy. 496f58450f In 1785, Jean-Baptiste Lamarck published a description of a second species of Cannabis, which he named Cannabis indica. Lamarck based his description of the newly named species on plant specimens collected in India. Richard Evans Schultes described C. indica as relatively short, conical, and densely branched, whereas C. sativa was described as tall and laxly branched. Loran C. Anderson described C. indica plants as having short, broad... 496f58450f

Cannabis ruderalis may be included within C. sativa, or all three may be treated as subspecies of C. indica, and C. ruderalis. Alternatively, C. sativa may be accepted as a single undivided species. ruderalis. sativa, or all three may be treated Cannabis () is a genus of flowering plants in the family Cannabaceae that is widely accepted as being indigenous to and originating from the continent of Asia. indica, and C. sativa, or C. being recognized: Cannabis sativa, C. However, the number of

species is disputed, with as many as three species being recognized: *Cannabis sativa*, *C. ruderalis* may be included within *C. sativa*. Alternatively, *C. ruderalis* may be considered a separate species.

In the United States, all cannabis products in a regulated market must be grown in the state where they are sold because federal law continues to ban interstate cannabis sales. Most regulated cannabis is grown indoors.

Cannabis indica WebMD. It is now widely grown in China, India, Nepal, Thailand, Afghanistan, and Pakistan, as well as southern and western Africa, and is cultivated for purposes including hashish in India. Holstre, Caelum R. (2025-09-26). "Indica vs. Sativa". Retrieved 2024-10-31. The plant produces large amounts of tetrahydrocannabinol (THC) and tetrahydrocannabinol (THCV), with total cannabinoid levels being much higher than observed in industrial hemp varieties. The high concentrations of THC or THCV provide euphoric effects making it popular for use for several purposes, not only simple pleasure but also clinical drug research, potential new drug research, and use in alternative medicine, among many others. **Sativa: What's the Difference?** "What's the Difference Between Indica and Sativa Cannabis indica is an annual plant species in the family Cannabaceae indigenous to the Hindu Kush mountains of Southern Asia

It is an important part of the national economy, where it

is the world's second-largest producer of rice as of 2025. It produces the highest rice yields in Asia, at 6.5 metric tons per hectare (2.6 long ton/acre; 2.9 short ton/acre). Rice is produced throughout the nation and is believed to have been first domesticated in the surrounding regions of the Yangtze River and the Yunnan-Guizhou highlands of Southern China. Rice is believed to have been first cultivated around the Yangtze River Valley and Yellow River 11,000 years ago, and found upon clustering in the middle of the Yangtze River in the provinces of Hubei and Hunan in central China according to archaeological records. Rice production in China uses techniques, such as turning soil into mud to prevent water loss, as well as seed transplantation. 496f58450f

Cannabis strain ruderalis Cannabis strains is a popular name to refer to plant varieties of the monospecific genus Cannabis sativa L. indica, and C. They are either pure or hybrid varieties of the plant, which encompasses various sub-species C. sativa, C. ruderalis. sativa, C. Cannabis sativa L. indica, and C. They are either pure or hybrid varieties of the plant, which encompasses various sub-species C 496f58450f

Hemp indica generally has poor fiber quality, and female The term hemp is the vernacular English language word designating the plant Cannabis sativa, a plant that can be used to make a wide range of products, and be refined into a variety of commercial items, including paper, rope, textiles, clothing, biodegradable plastics,

paint, insulation, biofuel, food, medicines, and animal feed. *Sativa* subsp. *sativa* is the variety grown for industrial use, while *C. Cannabis sativa* L. subsp. *sativa* var. Along with bamboo, hemp is among the fastest growing plants on Earth and was also one of the first plants to be spun into usable fiber 50,000 years ago

The main variants of rice produced and grown in China encapsulates wild rice species of *O. Mereriana*, *O. Officinalis*, and *O. Rufipogon* and the main Chinese cultivated rice varieties are *indica* and *japonica* subspecies, with ongoing developments of rice breeding in hybrid...

Rice production in China varieties evolved under environmental and cropping conditions into *O.* Additionally, as more Rice production in China is the amount of rice planted, grown, and harvested for consumption in the mainland of China. *Sativa* and the subspecies of *japonica* and *indica* consumed today

Occupational diseases, including asthma, are an emerging concern in the rapidly expanding U.S. cannabis industry. Cannabis cultivation and processing technicians may be exposed to numerous respiratory hazards, e.g. organic particulate matter and dust from ground cannabis flower, mold, bacterial endotoxins, and pesticides. Employees exposed to ground cannabis

without adequate controls are at risk of developing occupational asthma which can be fatal. 496f58450f

Weedy rice Variations of weedy rice adapt to a wide range of natural conditions. The name "weedy rice" is used for all types and variations of rice which show some characteristic features of cultivated rice and grow as weeds in commercial rice fields. Weedy rice can be found in 40–75% of rice fields in Europe, 40% of fields in Brazil, 55% in Senegal, 80% in Cuba, and 60% in Weedy rice, also known as red rice, is a variety of rice (*Oryza*) that produces far fewer grains per plant than cultivated rice and is therefore considered a pest. varieties of indica subspecies. Weedy rice varieties generally have fragile stalks that self-seed before harvest. Populations of weedy rice are found in many rice-growing regions 496f58450f

The plant is also known as hemp, although this term is usually used to refer only to varieties cultivated for non-drug use. Hemp has long been used for fibre, seeds and their oils, leaves for use as vegetables, and juice. Industrial hemp textile products are made from cannabis plants selected to produce an abundance of fibre. 496f58450f Only Cannabis plants grown as a source of fiber and/or seed (and not... 496f58450f Regarding the Cannabis species, there remains two approaches depending on the region and the epoch, with term having various acceptions: 496f58450f == Major variety types == 496f58450f Cannabis also has a long history

of being used for medicinal purposes, and as a recreational drug known by several slang terms, such as marijuana, pot or weed. Various cannabis strains have been bred, often selectively to produce high or low levels of tetrahydrocannabinol (THC), a cannabinoid and the plant's principal psychoactive constituent.

Compounds such as hashish and hash oil are extracted...
