The pulp is the neurovascular bundle central to each tooth, permanent or primary. It is composed of a central pulp chamber, pulp horns, and radicular canals. The large mass of the pulp is contained within the pulp chamber, which is contained in and mimics the overall shape of the crown of the tooth. Because of the continuous deposition of the dentine, the pulp chamber becomes smaller with the age. This is not uniform throughout the coronal pulp but progresses faster on the floor than on the roof or sidewalls. 211660ba2a

Elephant The large ear flaps assist in maintaining a constant body temperature as well as in communication. The trunk is prehensile, bringing food and water to the mouth and grasping objects. African elephants have larger ears and concave backs, whereas Asian elephants have smaller ears and convex or level backs. first chewing tooth on each side of the jaw falls out when the elephant is two to three years old. Tusks, which are derived from the incisor teeth, serve both as weapons and as tools for moving objects and digging. They are the only surviving members of the family Elephantidae and the order Proboscidea; extinct relatives include mammoths and mastodons. Distinctive

features of elephants include a long proboscis called a trunk, tusks, large ear flaps, pillar-like legs, and tough but sensitive grey skin. Three living species are currently recognised: the African bush elephant (*Loxodonta africana*), the African forest elephant (*L. cyclotis*), and the Asian elephant (*Elephas maximus*). This is followed by four more tooth replacements at Elephants are the largest living land animals 211660ba2a

== Most venomous species == 211660ba2a In 1999, the crew began the series with a pilot episode titled "Banjo Frenzy", which features a blue dinosaur, a light blue squirrel, a yellow rabbit (Cuddles), and a purple beaver. The first official episode is titled "Spin Fun Knowin' Ya!" which, although it was produced in 1999, was uploaded to the Mondo Media website in December 2000 and featured later versions of the dinosaur (now a moose), rabbit, squirrel, and beaver. From that point on, the writers began introducing new characters to the show. It quickly became an internet phenomenon, receiving millions of views per episode. In 2006, the Happy Tree Friends television series aired on G4 in the United States. It also aired on G4 and Razer in Canada in 2007. 211660ba2a The series was predated by two 1981 specials hosted by Palance on May 3, 1981 (directed by Ronald Lyon) and November 6, 1981. 211660ba2a

Pulp (tooth) The pulp's activity and signalling processes regulate its behaviour. The dental pulp nerve is innervated by one of the trigeminal The pulp is the connective tissue, nerves, blood vessels, and odontoblasts that comprise the innermost layer of a tooth. vascularised and innervated region of the tooth, it is the site of origin for most pain-related sensations 211660ba2a

History of radiation protection diseases, cardiovascular diseases, nerve pain such as sciatica, or nervous diseases such as neurasthenia and hysteria. In dermatology, fungal diseases, ulcers 211660ba2a

The varieties of snakes that most often cause serious snakebites depend on the region of the world. In Africa, the

most dangerous species include black mambas, puff adders, and carpet vipers. In the Middle East, the species of greatest concern are carpet vipers and elapids; in Central and South America, Bothrops (including the terciopelo or fer-de-lance) and Crotalus (rattlesnakes) are of greatest concern. In South Asia, it has historically been believed that Indian cobras, common kraits, Russell's viper, and carpet vipers were the most dangerous species; however, other snakes may also cause significant problems in this region. While several species of snakes may cause more bodily harm than others, any one of these venomous snakes is still very capable of causing a human fatality should a bite go untreated, regardless of venom capabilities or behavioral tendencies. 211660ba2a The total volume of all the permanent teeth organs is 0.38cc, and the mean volume of a single adult human pulp is 0.02cc. 211660ba2a
