Iranian traditional medicine difficulty learning or remembering something, having difficulty digesting food, bloating, frequent urination, sour burp, and diarrhea are the symptoms of excessive Iranian traditional medicine (ITM) (Persian: تببه سوناتی-ه ایرانی, romanized: tebbe sonnati-e irāni), also known as Persian traditional medicine, is one of the most ancient forms of traditional medicine ed807dc16c

Wheat is grown on a larger area of land than any other food crop (219.5 million hectares or 542 million acres in 2024). World trade in wheat is greater than that of all other crops combined. In 2024, world wheat production was 799 million tonnes (881 million short tons), making it the second most-produced cereal after maize (known as corn in North America and Australia). Since 1960, world production of wheat and other grain crops has tripled and is expected to grow further through the middle of the 21st century. Global demand for wheat is increasing because of the usefulness of gluten to the food industry. ed807dc16c Wheat is an important source of carbohydrates.
