Running All forms involve the same basic stages of a main propulsion phase, where the person drives forward the hardest leading with one leg; a foot placement phase where they place their foot, absorb any impact and stabilise themselves- they regain their sense of balance and recover energy; they then start a new propulsion phase, this time with the other leg. This is in contrast to walking, a slower form of movement where at least one foot is always in contact with the ground. This sequence continues and together forms a flow of actions which constitutes the runner's gait. elite runners include increased hip function, use, and stride length over recreational runners. The hip-hop genre and culture emerged from block parties in the Bronx. DJs began expanding the instrumental breaks of popular records when they noticed how excited it would make the crowds. The extended breaks provided a platform for break dancers and rappers. These breakbeats enabled the subsequent evolution of the hip-hop style.
