Birth control in Japan Prior to World War I common forms of birth control included abortion, infanticide, and condoms. However, it was the militarists, whose goal of achieving a strong population in order to establish Japan as an international power prevailed, as Japan prepared to enter World War II. Birth control as an oral contraceptive, while known in intellectual circles, was not widely circulated until the interwar period when the debate over birth control gained public support and momentum. There were also concerns about the medication's side effects. In 1999 Birth control in Japan has been available since at least the 17th century, and its evolution has been informed by political, social, and economic contexts. access to birth control pills would reduce condom use, and thereby increase STI rates. The end of World War II, and Japan's subsequent demilitarization brought an emphasis on population reduction by the US-led occupation SCAP (Supreme Command for the Allied Powers) who were fearful of a rise in communism or militarism which would create a threat to democracy and the "free-world. Birth control movement in the United States The movement began in 1914 when a group of political radicals in New York City, led by Emma Goldman, Mary Dennett, and Margaret Sanger, became concerned about the hardships that childbirth and self-induced abortions brought to low-income women. S. Hoping to provoke a favorable legal decision, Sanger deliberately broke the law by distributing The Woman Rebel, a newsletter containing a discussion of contraception. Since contraception was considered to be obscene at the time, the activists targeted the Comstock laws, which prohibited distribution of any "obscene, lewd, and/or lascivious" materials through the mail. In 1916, Sanger opened the first birth control clinic in the United States, but the clinic was immediately shut down by police, and Sanger was sentenced to 30 days in jail. through education and legalization.
