

Does Coca Cola Has Caffeine

Coca-Cola was developed in May 1886 by pharmacist John Stith Pemberton. At the time it was introduced, the product contained the stimulants cocaine from coca leaves and caffeine from kola nuts, which together acted synergistically. The coca and the kola are the source of the product name and led to Coca-Cola's promotion as a "healthy tonic". Pemberton had been severely wounded in the American Civil War and had become addicted to the pain medication morphine. At the time, cocaine was being promoted as a "cure" for opioid addiction, so he developed the beverage as a patent medicine in an effort to control his addiction.

In 1932, Karl Flach flew to the US and came back with the idea to develop a German equivalent to Coca-Cola. After the Second World War, Afri-Cola became one of the most popular drinks in Germany and a symbol of the West German Wirtschaftswunder. In 1952, the company launched Bluna, an orange soft drink similar to Fanta, which also became a hit among customers. However, in the hard competition of the 1960s, Afri-Cola started to lose its influence on

the German market to Coca-Cola and Pepsi. To update its image, the company hired designer and photographer Charles Wilp who created a controversial and attention-grabbing marketing campaign (with lustful nuns drinking Afri... 6d940ca1c3
