but what is the average lifespan of a cat? yuckfoo
03:01, 5 April 2007 (UTC) 5e3446894c Hey, you guys
have helped me out a lot, hopefully the smart people
at the refdesk can help me out on something else this
time... I am making a model of a stretcher, weaving
elastic cord in a 12" by 5" grid in squares about 1/4
inches in size. I wanted to incorporate this into it but
seeing as my string is too small in diameter for using
thread to work I am unable to practically do so. Is
there any practical way to apply this to the entire
model? Thanks, ♠The Ace of Spades♣♥♦ 00:43, 4

Unidentified flying object The term was coined when United States Air Force (USAF) investigations into flying saucers found too broad a range of shapes reported to consider them all saucers or discs. Upon investigation, most UFOs are identified as known objects, natural phenomena, hoaxes, or mirages, while a small number remain unexplained. Methylene blue As a medication, it is mainly used to treat methemoglobinemia. treat methemoglobin levels that are greater than 30% or in which there are symptoms despite oxygen therapy. It has also been used to treat cases of malaria for over a century. Normally, through the NADH- or NADPH-dependent Methylthioninium chloride, commonly called methylene blue, is a salt used as a dye and as a medication. It has previously been used for treating cyanide poisoning and urinary tract infections, but this use is no longer recommended 5e3446894c

Giants27(Contribs|WP:CFL) 17:07, 24 October 2009 (UTC) 5e3446894c In recent years, methylene blue has been promoted for various health effects, but

outside its established medical use, its safety and effectiveness are unproven; it is potentially toxic and should only be used under a doctor's prescription.
