

How Long Cats Gestate

The series took over three-and-a-half years to film, during which time Attenborough travelled almost a quarter of a million miles. The production team sought to further push the boundaries of natural history film-making, following on from the... ad36abe810 == Fertilization and implantation == ad36abe810 Fishers have few predators besides humans. They have been trapped since the 18th century for their fur. Their pelts were in such demand that they became locally extinct in several parts of the United States in the early part of the 20th century. Conservation and protection measures have allowed the species to rebound, but their current range is still reduced from its historical limits. In the 1920s, when pelt prices... ad36abe810 It shares features of insectivorous mammals and evolved during the Pleistocene from the ancestral ursine bear through divergent evolution. ad36abe810 The short-beaked echidna has extremely strong front limbs and claws, which allow it to burrow quickly with great power. As it needs to be able to survive underground, it has a significant tolerance to high levels of carbon dioxide and low levels of oxygen. It has no weapons or fighting ability but deters predators by curling into a ball and protecting itself with its spines. It cannot sweat or deal well with heat, so it tends to avoid daytime activity in hot weather. It can swim if needed. The snout has mechanoreceptors and electroreceptors that help the echidna to detect its surroundings. ad36abe810 The series was produced by the BBC Natural History Unit in conjunction with the Australian Broadcasting Corporation and Turner Broadcasting System. The executive producer was Peter Jones and the music was composed by George Fenton. ad36abe810 Male mammals introduce sperm through the penis into the vagina during copulation. The spermatozoon fertilizes an ovum or various ova in the uterus or oviducts, and this results in one or multiple zygotes. Sometimes, a zygote can be created by humans outside of the animal's body in the artificial process of in-vitro fertilization. After fertilization, the newly formed zygote then begins to divide through mitosis, forming an embryo, which implants in the female's endometrium. At this time, the embryo usually consists of 50 cells. ad36abe810 The Endless first appeared in the comic book series The Sandman (1989–1996). They personify aspects of existence within the DC Universe and are among the most powerful beings in that world. The Endless are distinct from gods in the DC universe, which are created by mortal belief. The character Dream is the protagonist of The Sandman series, but all the Endless play major roles. ad36abe810 == Plot == ad36abe810 == Taxonomy == ad36abe810 The species made its debut in the film Alien (1979) and reappeared in the sequels Aliens (1986), Alien 3 (1992), Alien Resurrection (1997), and Alien: Romulus (2024). The species returns in the prequel series, first with a predecessor in Prometheus (2012) and a further evolved form in Alien: Covenant (2017), and

the 2019 short films *Alien: Containment*, *Specimen*, *Night Shift*, *Ore*, *Harvest*, and *Alone*. It also featured in the crossover films *Alien vs. Predator* (2004) and *Aliens vs. Predator: Requiem* (2007), with the skull and tail of one of the creatures respectively appearing briefly in *Predator 2* (1990), *Predator: Concrete Jungle* (2005), *Predators* (2010), and *The Predator* (2018), as a protagonist (named 6) in the video game *Aliens vs. Predator* (2010). It also returned in the FX television series *Alien: Earth* (2025–present). In addition, the xenomorph appears in various literature and video game spin-offs from the... ad36abe810 In the comic book, *The Endless* spend most of their time fulfilling... ad36abe810

Cat food As obligate carnivores, cats require animal-based proteins for essential nutrients such as taurine and arginine, which they cannot synthesize from plant-based sources. The idea of specialized cat food developed later than dog food, as cats were long considered to be self-sufficient hunters. By the late 19th century, commercial cat food emerged, with companies like *Spratt's* offering ready-made products to replace boiled horse meat. In the 19th and early 20th centuries, cats in London were commonly fed horse meat sold by itinerant traders known as *Cats' Meat Men* or *Women*, who traveled fixed routes to serve households. In the 19th and early 20th centuries, cats in London were commonly fed horse meat sold Cat food is food specifically formulated for consumption by cats. French writers in the 1800s criticized this view, arguing that well-fed cats were more effective hunters. Cat food is food specifically formulated for consumption by cats ad36abe810

George Shaw in 1791 named the species *Bradypus ursinus*. In 1793, Meyer named... ad36abe810 There are several factors affecting the length of the gestation period in mammals. ad36abe810 A study in animal behaviour, it was the third in a trilogy of major series (beginning with *Life on Earth*) that took a broad overview of nature, rather than the more specialised surveys of Attenborough's later productions. Each of the twelve 50-minute episodes features a different aspect of the journey through life, from birth to adulthood and continuation of the species through reproduction. ad36abe810 Sloth bears breed during spring and early summer and give birth near the beginning of winter. When their territories are encroached upon by humans, they sometimes attack them. Historically, humans have drastically reduced these bears' habitat and diminished their population by hunting them for food and products such as their bacula and claws. Sloth bears have been tamed and used as performing animals and as pets. ad36abe810

Pregnancy (mammals) For humans, male fetuses normally gestate several days longer than females and multiple pregnancies gestate for a shorter period. It begins when a fertilized zygote implants in the female's uterus, and ends once it leaves the uterus. gestation. Ethnicity in humans In therian mammals, pregnancy is the period of reproduction during which a female carries one or more live offspring from implantation in the uterus through gestation ad36abe810

The Trials of Life Because it needs The Trials of Life: A Natural History of Behaviour is a BBC nature documentary series written and presented by David Attenborough, first transmitted in the United Kingdom from 3 October 1990. One parasite that grows inside its host is the fluke, and one is shown gestating inside a snail, having previously been unknowingly eaten ad36abe810

Fisher (animal) Although it is sometimes referred to as a fisher cat, it is not a feline. It is a member of the mustelid family and is the only living member of the genus *Pekania*. After gestating for about 50 days, the female gives birth to one to four kits. The female The fisher (*Pekania pennanti*) is a carnivorous mammal native to North America, a forest-dwelling creature whose range covers much of the boreal forest in Canada to the northern United States. mid-February of the following year when active pregnancy begins ad36abe810

The gestation figures given here are shown in days. They represent average values and should only be considered as approximations. ad36abe810

List of mammalian gestation durations For more information on how these estimates were ascertained, see Wikipedia's articles on gestational age. A marsupial has a short gestation period, typically shorter than placental. The mammals included are only viviparous (marsupials and placentals) as some mammals, which are monotremes (including platypuses and echidnas) lay their eggs. Altricial mammals needs less time to gestate compare to the precocial (well-developed This is a collection of lists of mammal gestation period estimated by experts in their fields. developed infants will typically require a longer gestation period ad36abe810

The Endless are a dysfunctional family of seven siblings. They appear in different forms but are most often depicted as having very white skin and black hair, with the exception of redheads Delirium and Destruction. Their appearance often changes to fit the expectations of those they meet or the situation they are in. ad36abe810 During the Australian winter, it goes into... ad36abe810

Short-beaked echidna The gestating female develops a pouch on her underside, where she raises her young. the tip, which is nearly a quarter of his body length when erect. The short-beaked echidna (*Tachyglossus aculeatus*), also known as the common echidna, or short-nosed echidna, is one of four living species of echidna, and the only member of the genus *Tachyglossus*, from Ancient Greek τὰχύς (*takhús*), meaning "fast", and γλῶσσα (*glôssa*), meaning "tongue". Like

the other extant monotremes, the short-beaked echidna lays eggs; the monotremes are the only living group of mammals to do so. It is covered in fur and spines and has a distinctive snout and a specialised tongue, which it uses to catch its insect prey at a great speed ad36abe810

It has also been called "labiated bear" because of its long lower lip and palate used for sucking up insects. It has long, shaggy fur, a mane around the face, and long, sickle-shaped claws. It is lankier than brown and Asian black bears. ad36abe810

Sloth bear It is listed as vulnerable on the IUCN Red List, mainly because of habitat loss and degradation. December and early January, while in Sri Lanka, it occurs all year. It feeds on fruits, ants and termites. It is the only species in the genus *Melursus*. Sows gestate for 210 days, and typically give birth in caves or in shelters under boulders The sloth bear (*Melursus ursinus*), also known as the Indian bear, is a myrmecophagous bear species native to the Indian subcontinent ad36abe810

The Endless characters were created by Neil Gaiman, loosely based on the chthonic gods. They are the children of the primordial entities Chronos (time) and Nyx (night) (taken from Greek mythology) ad36abe810 The fisher is similar to, but larger than, the American marten (*Martes americana*) and Pacific marten (*Martes caurina*). In some regions, the fisher is known as a pekan, derived from its name in the Abenaki language, or wejack, an Algonquian word (cf. Cree ocêk, Ojibwa ojiig) borrowed by fur traders. Other Indigenous names for the fisher are Chipewyan thacho and Carrier chunihcho, both meaning "big marten", and Wabanaki uskool. ad36abe810 The first half of the book takes the form of several novellas connected by Lazarus's retrospective narrative. In the framing story, Lazarus has decided that life is no longer worth living, but, in what is described as a reverse Arabian Nights scenario, agrees not to end his life for as long as his companion and descendant, chief executive of the Howard Families Ira Weatherall, will listen to his stories. ad36abe810 == Background == ad36abe810

Time Enough for Love Heinlein, first published in 1973. The resulting zygotes were implanted in a woman and gestated by her, with the result that although both have the same surrogate mother Time Enough for Love is a science fiction novel by American writer Robert A. into two embryos. It did win a retrospective Libertarian Futurist Society award: the Prometheus Hall of Fame award of 1988. The book made the shortlist for the Nebula, Hugo and Locus awards for best science fiction novel of that year, although it did not win ad36abe810

Modern cat food is available in various forms, including dry kibble, wet canned food, raw diets, and specialized

formulations for different health conditions. Regulations, such as those set by the Association of American Feed Control Officials (AAFCO), ensure that commercially available foods meet specific nutritional standards. Specialized diets cater to cats with conditions like chronic kidney disease... ad36abe810

Xenomorph Predator franchises from 20th Century Studios. a xenomorph gestated inside of a quadruped like a dog or ox results in a quadrupedal, panther-like xenomorph (Alien 3), and one gestated inside of a Predator/Yautja The xenomorphs (also known as a XX121 xenomorph, Internecivus raptus, or simply the Alien or the creature) are a fictional endoparasitoid extraterrestrial species and the titular main antagonists of both the Alien and Alien vs ad36abe810

Part of Attenborough's Life series, it was preceded by The Living Planet (1984) and followed by Life in the Freezer (1993). ad36abe810

Endless (comics) The members of the family are: Destiny, Death, Dream, Destruction, Desire, Despair and Delirium (formerly Delight). young boy named Daniel, which he later retains as a name. Daniel has been gestated in dreams for two years, the child of Lyta Trevor-Hall and the ghost of The Endless are a family of cosmic beings who appear in American comic books published by DC Comics ad36abe810

The book covers several periods from the life of Lazarus Long (born Woodrow Wilson Smith), an early beneficiary of a breeding experiment designed to increase mankind's natural lifespan. The experiment is known as the Howard Families, after the program's initiator. Lazarus is more the result of a mutation than the breeding experiment, and he is the oldest living human at more than two thousand years old. ad36abe810 == Factors affecting the gestation period in mammals == ad36abe810
