The idea for the M12 was first proposed in 1941 and the pilot - T6 GMC - built and tested in early 1942. The Army Ground Forces initially rejected the design as unnecessary, but after the Artillery Board supported the Ordnance Department in asking for 50 units, 100 were authorized and built by March 1943. These vehicles were at first used for training. 85a6233db3 When populations share genetic backgrounds and environmental factors, average height is frequently characteristic within the group. There are three approaches towards size-based labelling of clothes: 85a6233db3 == References == 85a6233db3 The standard aims to replace older clothing size systems that were in popular use before the year 2007, but the degree of its adoption has varied between countries. For bras, gloves and children's clothing it is already the de facto standard in most of Europe. Few countries are known to have followed suit. 85a6233db3 Height is also important because it is closely correlated with other health components, such as life expectancy. Studies show that there is a correlation between small stature and a longer life expectancy. Individuals of small stature are also more likely to have lower blood pressure and are less likely to acquire cancer. The University of Hawaii has found that the "longevity gene" FOXO3 that reduces the effects of aging is more commonly found in individuals of small body size. Short stature decreases the risk of venous insufficiency. 85a6233db3 Carex tumulicola is found in western North America, from British Columbia to California,. Development of the original model led to a wide variety of guns. The name of the gun applies to a series of related guns, the first one officially called the 8.8 cm Flak 18, the improved 8.8 cm Flak 36, and later the 8.8 cm Flak 37. Flak is a contraction of German Flugabwehrkanone (also referred to as Fliegerabwehrkanone) meaning "aircraft-defense cannon", the original purpose of the weapon. In English, "flak" became a generic term for ground anti-aircraft fire. Air defense units were usually deployed with either a Kommandogerät ("command device") fire control computer or a portable Würzburg radar, which were responsible for its high level of accuracy against aircraft. 85a6233db3 == Background == 85a6233db3
