In addition, alcoholic drinks such as wine, beer, and liquor, which contain the psychoactive substance ethanol, have been part of human culture for more than 8,000 years. Non-alcoholic drinks typically refer to beverages that are traditionally alcoholic but are produced with a very low alcohol by volume content or the alcohol is removed. == Biology == When the human body becomes dehydrated, a person experiences thirst. This craving for fluids results in an instinctive need to drink. Thirst is regulated by the hypothalamus in response to subtle changes in the body's electrolyte levels, and also as a result of changes in the volume of blood circulating. The complete deprivation of drinks (that is, water) will result in death faster...

Energy drink They may or may not be carbonated and may also contain sugar, as well as other sweeteners, or herbal extracts, among numerous other possible ingredients. Energy drinks are different from sugar-sweetened beverages. While both energy drinks and sugar-sweetened beverages typically contain high levels of sugar, energy drinks include stimulants like caffeine and taurine and are marketed for energy, and sugar-sweetened beverages like sodas and fruit juices usually are not. a recipe/module on Citrus Energy Drink Wikibooks Cookbook has a recipe/module on Herbal Energy Drink An energy drink is a type of non-alcoholic psychoactive An energy drink is a type of non-alcoholic psychoactive functional beverage containing stimulant compounds, usually caffeine (at a higher concentration than ordinary soft drinks) and taurine, which is marketed as reducing tiredness and improving performance and concentration (marketed as "energy", but distinct from food energy)

A long drink will have a tall glass full of mixer, in contrast to a short drink, or shooter, which has less mixer, or none. Short drinks are generally stronger since both types tend to contain the same amount of alcohol.
