Hemorrhoid In their normal state, they are cushions that help with stool control. They become a disease when swollen or inflamed; the unqualified term hemorrhoid is often used to refer to the disease. A skin tag may remain after the healing of an external hemorrhoid. Symptoms frequently get better after a few days. Internal hemorrhoids often result in painless, bright red rectal bleeding when defecating. External hemorrhoids often result in pain and swelling in the area of the anus. If bleeding occurs, it is usually darker. or anal fissures, constipation, prolonged straining during delivery, and delivering a larger baby (weighing over 3,800 grams) are risk factors for hemorrhoids Hemorrhoids (or haemorrhoids), also known as piles, are vascular structures in the anal canal.
