An email address, such as jane.smith@example.com, is made up of a local-part, the symbol @, and a domain, which may be either a domain name or an IP address enclosed in brackets. Although the standard stipulates that the local-part is case-sensitive, it also urges that receiving hosts deliver messages in a case-independent manner, e.g., that the mail system in the domain example.com treat Jane.Smith as equivalent to jane.smith. (Some mail systems even treat both as equivalent to jane smith.) Email systems often limit the user's choice of name to a subset of the characters permitted by the RFCs... 3329b51fbf

Email is a ubiquitous and very widely used communication medium; in current use, an email address (commonly local-part + @ + domain name) is often treated as a basic and necessary part of many processes in business, commerce, government, education, entertainment, and other spheres of daily life in most countries 3329b51fbf

Some email applications, such as Microsoft Office Outlook and Mozilla Thunderbird, employ a read-receipt tracking mechanism. The sender selects the receipt request option prior to sending the message, and then upon sending, each recipient has the option of notifying the sender that the message was received or read by the recipient. 3329b51fbf Email tracking is useful when the sender wants to know whether the intended recipient actually received the email or clicked the links. However, due to the nature of the technology, email tracking cannot be considered an absolutely accurate indicator that a message was opened or read by the recipient. 3329b51fbf Most email marketing software provides tracking features, sometimes in aggregate (e.g., click-through rate), and sometimes on an individual basis. 3329b51fbf
