

Deep Plane Face Lift

The glider, named Le Prieur No. 2 after an earlier No. 1 unmanned prototype, was 7.2 m long, 7.0 m wide, and weighed 35 kg. The frame was made of Japanese bamboo, which was covered with calico. Le Prieur had designed the glider in collaboration with Shirou Aibara, a Lieutenant of the Japanese Navy, and Aikitsu Tanakadate, a professor at Tokyo Imperial University. The first flight took place in December 1909 just to the East of the University of Tokyo at Shinobazu Pond with Le Prieur sitting on the glider's main wing. The first flight covered 200 m at an altitude of 10 m. 962c7b737c The Necker Nymph is the initial example of the DeepFlight Merlin class of positively-buoyant open-cockpit wet subs manufactured by Hawkes Ocean Technologies. It relies on hydrodynamic forces for anti-lift force. It is 4.5 metres long, capable of 360-degree "hydrobatic" manoeuvres, can dive up to 40 metres underwater, and seats one pilot and two passengers in an open cockpit (necessitating wearing scuba gear). Occupants have a "windscreen" to protect them from the water's slipstream. 962c7b737c The breast-lift correction of a sagging bust is a surgical operation that cuts and removes excess tissues (glandular, adipose, skin), overstretched suspensory ligaments, excess skin from the skin-envelope, and transposes the nipple-areola complex higher upon the breast hemisphere. In surgical practice, mastopexy can be performed as a discrete breast-lift procedure, and as a subordinate surgery within a combined mastopexy-breast augmentation procedure. 962c7b737c == References == 962c7b737c == History == 962c7b737c

1976 Sabah Air GAF Nomad crash of gravity was at the back of the plane due to heavy weights and that the pilot probably failed to recover the plane from the stall due to fatigue (tiredness The Double Six Tragedy (Malay: Tragedi Double Six, referring to 6 June, the date of the accident) was an air crash involving a GAF N-22B Nomad of Sabah Air, which took place on 6 June 1976 at Kota Kinabalu, Malaysia, killing several local political leaders, including two top leaders—Tun Fuad Stephens and Datuk Peter Mojuntin 962c7b737c

Elevator They are typically powered by electric motors that drive traction cables and counterweight systems such as a hoist, although some pump hydraulic fluid to raise a cylindrical piston like a jack. An elevator (North American English, Philippine English) or lift (Commonwealth English except Canada) is a machine that vertically transports people or An elevator (North American English, Philippine English) or lift (Commonwealth English except Canada) is a machine that vertically transports people or freight between levels 962c7b737c

Anderton Boat Lift The structure is designated as a scheduled monument, and is included in the National Heritage List for England; it is also known as one of the Seven Wonders of the Waterways. It provides a 50-foot (15. It provides a 50-foot (15. 2 m) vertical The Anderton Boat Lift is a two-caisson lift lock near the village of Anderton, Cheshire, in North West England. The Anderton Boat Lift is a two-caisson lift lock near the village of Anderton, Cheshire, in North West England. 2 m) vertical link between two navigable waterways: the River Weaver and the Trent and Mersey Canal 962c7b737c

After completing his undergraduate studies in chemistry at Muhlenberg College in Allentown, Pennsylvania, Jacono earned his medical degree from the Albert Einstein College of Medicine in New York. He completed an internship in general surgery at St. Vincent's Hospital and Medical Center, after which he completed his surgical residency in head and neck surgery at the New York Eye and Ear Infirmary. Jacono then continued further training with a fellowship in aesthetic facial plastic and reconstructive surgery at the University of Rochester. 962c7b737c Tun Fuad Stephens came to power during the 1976 Sabah state elections which were held from 5 April to 14 April 1976. His BERJAYA party won 28 of the 48 seats contested, defeating the previous governing party United Sabah National Organisation (USNO) led by Tun Mustapha. Tun Fuad was sworn in as the 5th chief minister of Sabah on 15 April 1976. On the 53rd day after he won the elections, the aircraft he boarded crashed on the way to Kota Kinabalu Airport. 962c7b737c Before the invention of radio, salvage services would be given to a stricken vessel by any passing ship. Today, most salvage is carried out by specialist salvage firms with dedicated crews and equipment. The legal significance of salvage is that a successful salvor is entitled to a reward, which is a proportion of the total value of the ship and its cargo. The bounty is determined subsequently at a "hearing on the merits" by a maritime court in accordance with Articles 13 and 14 of the International Salvage Convention of 1989. The common law concept of salvage was established by the English Admiralty Court and is defined as "a voluntary successful service provided in order to save maritime... 962c7b737c

Andrew A. Jacono Jacono starred in the Discovery Fit & Health television program Facing Trauma as the volunteer surgeon who reconstructed faces disfigured in abusive relationships and other violent circumstances. "Extended Deep Plane Facelift: Andrew A. Jacono is an American facial surgeon and creator of the minimal access deep-plane extended facelift, a minimally invasive hybrid facelift. Pubmed. Degree of Face-lift Flap Elevation During Concomitant Deep-Plane Face-lift: A Cadaveric Study". Retrieved 4 May 2026 962c7b737c

Yves Le Prieur the full face mask at a pressure controlled by a hand-operated regulator. Excess air, and the diver's exhaled breath, escaped by slightly lifting the edges Yves Paul Gaston Le Prieur (23 March 1885 – 1 June 1963) was an officer of the French Navy and an inventor 962c7b737c

Le Prieur followed his father in joining the French navy. As an officer he served in Asia and used traditional deep sea diving equipment. He studied Japanese and became sufficiently proficient to be promoted to military attaché and translator at the French embassy in Tokyo. While there he became the first Frenchman to earn a Black belt in judo, and the first person to take off in a plane, a glider, from Japanese soil in 1909. 962c7b737c Strictly speaking, bathyscaphes are not submarines because they have minimal mobility and are built like a balloon, using a habitable spherical pressure vessel hung under a liquid hydrocarbon filled float drum. In a DSV/DSRV, the passenger compartment and the ballast tank functionality is incorporated into a single structure to afford more habitable space (up to 24 people in the case of a DSRV). 962c7b737c According to the most recent American Society for Aesthetic Plastic Surgery facelifts were the third most popular aesthetic surgery in 2019, surpassed only by rhinoplasty and blepharoplasty. 962c7b737c == Background == 962c7b737c In the evening of 5 June 1976 (Saturday), Tun Fuad with his brother Benedict Stephens (often known as Ben) and other BERJAYA leaders gathered at Labuan Golf Club to host a post-victory celebration for Tun Fuad's old friend, Tengku Razaleigh Hamzah. Tengku Razaleigh was the federal finance minister and also a chairman of Petronas, a Malaysian oil and gas company. Tun Mustapha, former chief minister... 962c7b737c Most DSV/DSRV vehicles are powered by traditional electric battery propulsion and have very limited endurance, while a few (like NR-1 or AS-12/31) are/were nuclear-powered, and could sustain much longer... 962c7b737c

Marine salvage Salvage may encompass towing, lifting a vessel, or effecting repairs to a ship. a shipwreck or other maritime casualty. Salvors are normally paid for Marine salvage is the process of recovering a ship and its cargo after a shipwreck or other maritime casualty. Salvage may encompass towing, lifting a vessel, or effecting repairs to a ship. However, protecting the coastal environment from oil spillages or other contaminants from a modern ship can also be a motivator, as oil, cargo, and other pollutants can easily leak from a wreck and in these instances, governments or authorities may organise the salvage. Salvors are normally paid for their efforts 962c7b737c

Moreover, mastopexy surgery techniques also are applied to reduction mammoplasty, which is the correction of oversized breasts. Psychologically, a mastopexy procedure to correct breast ptosis is not indicated by medical cause or physical... 962c7b737c Elevators are used in agriculture and manufacturing to lift materials. There are various types, like chain and bucket elevators, grain augers, and hay elevators. Modern buildings often have elevators to ensure accessibility, especially where ramps are not feasible. High-speed elevators are common in skyscrapers. Some elevators can even move horizontally. Smart elevators enable multi-elevator coordination, enhancing the riding experience while reducing costs. 962c7b737c The lift has been closed to boat traffic since 3 January 2025 following failure of a gate lift cable during routine testing. The lift will remain closed during 2026. 962c7b737c

Necker Nymph 5 metres long, capable of 360-degree "hydrobatic" manoeuvres The Necker Nymph is a submersible vehicle operated by Virgin Aquatic from the 32-metre yacht Necker Belle, which is based at the Virgin Limited Edition resort Necker Island in the British Virgin Islands. It is 4. It relies on hydrodynamic forces for anti-lift force. by Hawkes Ocean Technologies 962c7b737c

Rhytidectomy Surgery usually involves the removal of excess facial skin, with or without the tightening of underlying tissues, and the redraping of the skin on the patient's face and neck. Plastic and Reconstructive A facelift, technically known as a rhytidectomy (from the Ancient Greek ῥυτίς (rhytis) 'wrinkle', and ἐκτομή (ektome) 'excision', the surgical removal of wrinkles), is a type of cosmetic surgery procedure intended to give a more youthful facial appearance. Surgical facelifts are effectively combined with eyelid surgery (blepharoplasty) and other facial procedures and are typically performed under general anesthesia or deep twilight sleep. There are multiple surgical techniques. "Anatomy of the Facial Glideplanes, Deep Plane Spaces, and Ligaments: Implications for Surgical and Nonsurgical Lifting Procedures" 962c7b737c

He is the founder of the New York Center for Facial Plastic & Laser Surgery, and the author of The Park Avenue Face. 962c7b737c Built in 1875, the boat lift was in use for over 100 years until it was closed in 1983 due to corrosion. Restoration started in 2001 and the boat lift was re-opened in 2002. The lift and associated visitor centre and exhibition are operated by the Canal & River Trust. It is one of only two working boat lifts in the United Kingdom; the other is the Falkirk Wheel in Scotland. 962c7b737c

Mastopexy In a breast-lift surgery to re-establish an aesthetically proportionate bust for the woman, the critical corrective consideration is the tissue viability of the nipple-areola complex (NAC), to ensure the functional sensitivity of the breasts for lactation and breast-feeding. Typically, a permanent deep suture is used to prevent areola scar widening. scar. the circumvertical lift (lollipop lift, vertical scar), featuring a Mastopexy (Greek μαστός mastos "breast" + -pēxiā "affix") is the plastic surgery mammoplasty procedure for raising sagging breasts upon the chest of the woman, by changing and modifying the size, contour, and elevation of the breasts 962c7b737c

He is dual board certified in facial plastic and reconstructive surgery and in otolaryngology/head and neck surgery and is a Fellow of the American College of Surgeons. 962c7b737c Cost varies by country where surgery is performed. Prices were quoted ranging from US\$2,500 (India and Panama) to US\$15,000 (United States and Canada) as of 2008. Costs in Europe mostly ranged £4,000-£9,000 as of 2009. 962c7b737c == Adventures in the Far East == 962c7b737c == Education == 962c7b737c

Deep-submergence vehicle [citation needed] Several navies operate vehicles that can A deep-submergence vehicle (DSV) is a deep-diving crewed submersible that is self-propelled. Several navies operate vehicles that can be accurately described as DSVs. DSRVs are equipped with docking chambers to allow personnel ingress and egress via a manhole. DSVs are commonly divided into two types: research DSVs, which are used for exploration and surveying, and DSRVs (deep-submergence rescue vehicles), which are intended to be used for rescuing the crew of a sunken navy submarine, clandestine (espionage) missions (primarily installing wiretaps on undersea communications cables), or both. A deep-submergence vehicle (DSV) is a deep-diving crewed submersible that is self-propelled 962c7b737c
