== Toothpastes == c3143046a3 Relatively high ingestion of fluoride by babies and children may result in white marks on the teeth known as fluorosis. Excessive ingestion by babies and children can result in severe dental fluorosis, indicated by a brown or yellow coloring, weakening and brittleness of the teeth, or in severe cases, acute toxicity. Fluoride therapy typically uses the sodium fluoride form, though stannous fluoride may also be used. Fluoride decreases breakdown of teeth by acids, promotes remineralisation, and decreases the activity of bacteria. Fluoride works primarily through direct contact with teeth. c3143046a3 Later in life, he spent most of his time as treasurer and manager of his companies, the Sheffield Dentifrice Company (which later became Sheffield Pharmaceuticals) and the International Tooth Crown Company, in New London, Connecticut. c3143046a3

Fluoride therapy 1% (5,000 ppm) sodium fluoride toothpaste. Fluoride has also been used to treat a number of bone diseases. Fluoride therapy is the use of fluoride for medical purposes. This type of toothpaste is used in the same manner as regular toothpaste. Fluoride supplements are recommended to prevent tooth decay in children older than six months in areas where the drinking water is low in fluoride. toothpaste generally contains 1. It is typically used as a liquid, pill, or paste by mouth c3143046a3

Eugene's research leads Rick and Daryl to a truck filled with food, ammunition and other supplies including a case of toothpaste. They drive the truck along a different route to return to Alexandria, and stop at a gas station to loot a fallen vending machine. As they struggle to break into it, a long-haired... c3143046a3 == Founding == c3143046a3

List of toothpaste brands Toothpaste is used Toothpaste is a gel dentifrice used in conjunction with a toothbrush to help clean and maintain the aesthetics and health of teeth. Toothpaste is a gel dentifrice used in conjunction with a toothbrush to help clean and maintain the aesthetics and health of teeth. Toothpaste is used to promote oral hygiene; it functions as an abrasive agent that helps to remove dental plaque and food from the teeth, works to suppress halitosis, and delivers active ingredients such as fluoride or xylitol to the teeth and gums to help prevent tooth decay (cavity) and gum disease (gingivitis) c3143046a3
