COVID-19 pandemic in Uruguay 14 March 2020. Retrieved 14 March 2020. El País (in Spanish). "Hay 80 casos sospechosos The COVID-19 pandemic in Uruguay has resulted in 1,043,278 confirmed cases of COVID-19 and 7,696 deaths. casos de coronavirus en Uruguay; todos se encuentran fuera de peligro" 48656eb124

On 3 March 2020, the virus was confirmed to have spread to Argentina. On 7 March 2020, the Ministry of Health confirmed the country's first documented death, a 64-year-old man who had travelled to Paris, France, who also had other health conditions; the case was only confirmed as positive after the patient's demise. 48656eb124 == Police brutality == 48656eb124 On 19 March 2020, a nationwide lockdown was established in Argentina. The lockdown was lifted throughout all the country, excepting the Greater Buenos Aires urban area (where 31.9% of the country's population live), on 10 May, with Greater Buenos Aires locked down until 17 July, where the lockdown was due to be gradually loosened in several stages to lead to the return to normality; restrictions were extended several times until 8 November 2020. During the second wave, another nationwide lockdown took place from 22 to 31 May 2021. 48656eb124 On January 12, 2020, the World Health Organization (WHO) confirmed that a novel coronavirus was the cause of a respiratory illness in a

cluster of people in Wuhan City, Hubei, China, which was reported to the World Health Organization (WHO) on December 31, 2019. 48656eb124

COVID-19 pandemic in Argentina As of 5 August 2026, a total of 10,119,594 people were confirmed to have been infected, and 130,850 people were known to have died because of the virus. The COVID-19 pandemic in Argentina is part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome The COVID-19 pandemic in Argentina is part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) 48656eb124

COVID-19 pandemic in Venezuela However, the first record of a patient claiming to have symptoms of coronavirus disease dates back to 29 February 2020, with government officials suspecting that the first person carrying the virus could have entered the country as early as 25 February. "Maduro informa que se elevan a 91 contagios de COVID-19 y dice que The COVID-19 pandemic in Venezuela was a part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). 19 March 2020. Efecto Cocuyo. Retrieved 3 May 2020. The first two cases in Venezuela were confirmed on 13 March 2020; the first death was reported on 26 March. torno a los casos de COVID-19" 48656eb124

The cases were concentrated in the Santiago metropolitan area, with outbreaks in other regions in the country. No national lockdown was established in Chile, unlike in neighboring Argentina and Peru, although a night curfew was implemented throughout the country. Quarantines were established locally in different cities and neighborhoods. However, in May 2020 the whole city of Santiago was put under mandatory quarantine due to an increase of cases, and similar situations were extended to most of the largest cities in Chile. 48656eb124 Venezuela is particularly vulnerable to the wider effects of the pandemic because of its ongoing socioeconomic and political crisis causing massive shortages of food staples and basic necessities, including medical supplies. The mass emigration of Venezuelan doctors has also caused chronic staff shortages in hospitals. 48656eb124 == Background == 48656eb124 During the COVID-19 pandemic, several police brutality cases took place in Argentina. The country has several levels of security forces: Federal (such... 48656eb124 In February 2021, Venezuela started vaccinations with the Russian Sputnik V COVID-19 vaccine and a vaccine... 48656eb124 The case fatality ratio for COVID-19 has been much lower than SARS of 2003, but the transmission has been significantly greater, with a significant total death toll. 48656eb124 As of December 2025, almost every family in Cuba has someone sick at home due to the country's epidemiological crisis which includes illnesses such as dengue, Oropouche and chikungunya, as well as respiratory viruses such as H1N influenza, respiratory syncytial virus, and Covid-19. 48656eb124 On 13 May 2020, it was reported that Latin America and the Caribbean had reported over 400,000 cases of COVID-19 infection with, 23,091 deaths. On 22 May 2020, citing the rapid increase of infections in Brazil, the World Health Organization declared South America the epicentre of the pandemic. 48656eb124 On 9 September 2021, by request of the 24 jurisdictions and because the manual loading of data from discharges of patients generates an overload in the epidemiological surveillance... 48656eb124

Statistics of the COVID-19 pandemic in Argentina 16 March 2020. "Death toll reaches 15,000 as Covid-19 surge This article presents official statistics gathered during the COVID-19 pandemic in Argentina. "Coronavirus en Argentina: confirman 9 casos más y ya son 65 los contagiados". Clarín (in Spanish). The National Ministry of Health publishes official numbers every night 48656eb124

Since 12 March 2020, contrasted data between the numbers reported by the provincial ministries and the total number provided by the national Ministry of Health show differences. This is because the ministries are giving their reports at different times throughout the day and also to different criteria regarding the counting of infected: by district of hospitalization or district of residence. 48656eb124 The Secretariat of Health, through the "Programa Centinela" (Spanish for "Sentinel Program"), estimated in mid-July 2020 that there were more than 2,875,734 cases in Mexico because they were considering the total number of cases confirmed as just a statistical sample. 48656eb124 On 19 March, a nationwide lockdown was established in Argentina until 31 March. The government later extended the lockdown through April, and May. On 9 May, the nationwide lockdown was lifted, excepting the Greater Buenos Aires urban area (where 31.9% of the country's population lives), with this area being locked down until 24 May, later extended to 7 June, and then 28 June, after a big jump in the number of new cases in this area. On 26 June, Fernández announced that the previously-eased restrictions on movement in this area would be tightened again until 17 July due to a large spike in cases on the previous days. Finally, on 17 July, the lockdown was due to be gradually loosened in several stages to lead to the return to normality, although restrictions were extended several times until at least 20 September. 48656eb124 The first cases in Uruguay were reported on 13 March 2020 by the Ministry of Public Health. The early cases were imported from Italy and Spain, with some local transmissions. The majority of early cases were traced to a wedding with 500 people in attendance in Montevideo, attended by a Uruguayan fashion designer who returned from Spain and later tested positive. Various containment measures were introduced in mid-March, and major restrictions on movement followed in late March. Uruguay is one of the few countries in Latin America to have been able to avoid large outbreaks for a considerable amount of time due to their closing of borders with neighboring countries. The country had one of the lowest numbers of active cases per population in South America up until December when the public health authorities announced that large outbreaks had led to community transmission in Montevideo. On 23 January 2021, President Luis Lacalle Pou announced during a press conference that the government purchased doses of COVID-19 vaccines from Pfizer and Sinovac Biotech, while negotiating with a third... 48656eb124 On 27 September 2020, the Ministry of Health of the Province of Buenos Aires (the most populated one) reported more than 3,500 extra deaths that were missed in previous reports. The provincial government called this a "re-categorization", and presented a new data entry system which —according to Provincial Health Minister Daniel Gollán— would avoid future under-reporting and data criticism. The deaths were later included in the national report of 1 October 2020. 48656eb124
