Hello. So an admin has blocked me for two years since I was using multiple IP addresses. First of all, as of late, I have not used a VPN. And secondly, the reason I appear under different IP addresses is simple. I'm an out of state student at LVC, a private school near Hershey Pennsylvania, and started editing Wikipedia pages on my free time at my high school and home for fun. So because of that, I would appear under three different IP addresses, one for home, one for my high school, and one for my college (LVC). If you could please review my block, that would be great. :) Thomasgilbertie (talk) 04:07, 8 August 2020 (UTC) c529clddbc Incandescent bulbs are manufactured in a wide range of sizes, light output, and voltage ratings, from 1.5 volts to about 300 volts. They require no external regulating equipment, have low manufacturing costs, and work equally well on either alternating current or direct current. As a result, the incandescent bulb became widely used in household and commercial lighting, for portable lighting such as table lamps, car headlamps, and flashlights, and for decorative and advertising lighting. c529clddbc Thomasgilbertie (talk · contribs · deleted contribs · logs · filter log · block user · block log) c529clddbc
