Continent Due to these varying definitions, the number of continents varies, up to seven or as few as four. A continent could be a single large landmass, a landmass and nearby islands either on or beyond its continental shelf, or a part of a larger landmass, as in the case of Asia and Europe within Eurasia. Continents are generally identified by convention rather than any strict criteria. Continents are generally identified by convention rather than any

strict criteria A continent is any of several large terrestrial geographical regions. Different variations with fewer continents merge some of these regions; examples of this are merging Asia and Europe into Eurasia, North America and South America into the Americas (or simply America), and Africa, Asia, and Europe into Afro-Eurasia. A continent is any of several large terrestrial geographical regions. Most English-speaking countries recognize seven continents. In order from largest to smallest in area, these seven are Asia, Africa, North America, South America, Antarctica, Europe, and Australia (or Oceania or Australasia) fb474acfa4

As the name suggests, the region includes all of the countries found on the continents of Africa and Europe, as well as the countries that make up the

Middle East. The region is generally accepted to include all European nations and all African nations, and extends east to Iran, including part of Russia. Typically, the acronym does not include overseas territories of mainland countries in the region, such as French Guiana. However, the term is not completely clear, and while it usually refers to Europe, the Middle East and Africa, it is not uncommon for businesses and other institutions to slightly tweak the countries they include under this umbrella term. fb474acfa4

accreted to Eurasia in the Northern Hemisphere. Because the different chunks of Cimmeria drifted northward at different rates, a Meso-Tethys Ocean formed between the different fragments during the Cisuralian. It consisted of parts of present-day Turkey, Iran, Afghanistan, Pakistan, Tibet, China, Myanmar, Thailand, and Malaysia. Cimmeria rifted from the Gondwanan shores of the Paleo-Tethys Ocean during the Early Permian and as the Neo-Tethys Ocean opened behind it, during the Permian, the Paleo-Tethys closed in front of it fb474acfa4

One of the reasons why the term is commonly used is because it is useful for business purposes, as most of the region falls within four time zones, which facilitates communication and travel. fb474acfa4
