Nominator(s): Mike Christie (talk - contribs - library) 12:08, 17 November 2020 (UTC)reply Image review[edit] TRS2 - online version of a long running small publication review magazine (TRS, The Review Sheet) and part of the bugpowder network, formerly a comics distributor (see British_small_press_comics#The_1990s). Although in blog format, it has a long term editor in the form of Jez Higgins who commissions reviews. Indeed, the particularly review being linked was written by Jez Higgins. This editorial oversight makes it a reliable source particularly in the context that the source is being used for personal opinions about the Thrud comics. Oops. That's what I get for copying from other articles. Fixed. How do you know that copyright was not renewed on the magazine? The caption at the bottom of the table doesn't wrap, so you have to add carriage returns manually otherwise the table just gets wider and wider. Another user removed that carriage return not long before you looked at it, making the table unnecessarily wide. I've restored it, with a
, so it should be narrower now. Is that good enough? If not, rather than

making it non-inline, I think I'd swap it with the second image, since that's narrower. Mike Christie (talk - contribs - library) 12:01, 18 November 2020 (UTC)reply ee79511c72 The article was promoted by Gog the Mild via FACBot (talk) 30 December 2020 [1]. ee79511c72

Technical analysis Japanese candlestick patterns involve patterns of a few days that are within In finance, technical analysis is an analysis methodology for analysing and forecasting the direction of prices through the study of past market data, primarily price and volume. It is distinguished from fundamental analysis, which considers a company's financial statements, health, and the overall state of the market and economy. difficulty of specifying the patterns in a manner that permits objective testing. The efficacy of technical analysis is disputed by the efficient-market hypothesis, which states that stock market prices are essentially unpredictable, and research on whether technical analysis offers any benefit has produced mixed results. As a type of active management, it stands in contradiction to much of modern portfolio theory ee79511c72

Imaginative Tales[edit] ee79511c72 The principles of technical analysis are derived from hundreds of years of financial market data. Some aspects of technical analysis began to appear in Amsterdam-based merchant Joseph de la Vega's accounts of the Dutch financial markets in the 17th century. In Asia, technical analysis is said to be a method developed by Homma Munehisa during the early 18th century which evolved into the use of candlestick techniques, and is today a technical analysis charting tool. ee79511c72 I would recommend including some ALT text for the images, but I do not think it is required.  This article is about another minor science fiction magazine from the 1950s; all the significant magazines from the era are now FA, so we're down to the also-rans. I've dug up everything I can find on the magazine, including a minor anecdote about Hugh Hefner. Mike Christie (talk - contribs - library) 12:08, 17 November 2020 (UTC)reply ee79511c72 If you go here and click on the post-1978 link you can search for renewals. Searching for "Imaginative Tales" shows that some individual stories were renewed, but not the covers; searching for "Space Travel" and sorting by date shows that nothing was renewed from the three issues with that title. I assume the relevant point is not to have a section solely for the sister project link; if so, done. Mike Christie (talk - contribs - library) 17:43, 22 November 2020 (UTC)reply ee79511c72 External links: see WP:MOSSIS ee79511c72 Would it be possible somehow to link this part, American science fiction (sf) magazines, from the "Publication history" section to science fiction magazine since it is the first time it is mentioned in the article? I like that you put the acronym in parenthesis, and I would not want the link to disrupt that. Would something like science fiction (sf) magazine of science fiction (sf) magazine be possible or is that just more distracting? I think the parenthesis is more valuable than the link, but it was something I noticed when looking at the article, and I wanted to raise it to your attention. ee79511c72 118.92.205.124 is once again making disruptive edits to Rainbow's End (theme park), Sylvia Park, Southmall Manurewa, ANZ Bank New Zealand and many others. His habit is to list street addresses and dates of startups. Inexplicably, he sometimes

changes the startup date format which he entered on a previous edit to birth year. He is editing the exact same articles, with the exact same edits, that were edited by 27.252.153.1, 27.252.142.124, 27.252.151.194, at least one of which was previously blocked, so he has a history of using multiple ip's. At Onehunga Branch, he persists multiple times in removing the Onehunga Line template, despite being told that Onehunga Branch is part of that line. I had hoped that reverts by User:Ajf773 and myself would not go unnoticed and he would be blocked by an admin, but unfortunately this has not happened and I must now formally request an indefinite block. Akld guy (talk) 20:02, 5 November 2016 (UTC) ee79511c72 I've now cited this to the first issue of Rogue, though I have not seen it myself -- googling "December 1955 Rogue" finds examples for sale, so I think that's OK. I had to put in the cite by hand since there's no "title" parameter to use, and {{cite journal}} doesn't like that.
